Fool's Gold Gillian Tett,2009-05-12 From award winning Financial Times journalist Gillian Tett who enraged Wall Street leaders with her news breaking warnings of a crisis more than a year ahead of the curve Fool s Gold tells the astonishing unknown story at the

heart of the 2008 meltdown Drawing on exclusive access to J P Morgan CEO Jamie Dimon and a tightly bonded team of bankers known on Wall Street as the Morgan Mafia as well as in depth interviews with dozens of other key players including Treasury Secretary Timothy Geithner Gillian Tett brings to life in gripping detail how the Morgan team's bold ideas for a whole new kind of financial alchemy helped to ignite a revolution in banking and how that revolution escalated wildly out of control The story begins with the intense Morgan brainstorming session in 1994 beside a pool in Boca Raton where the team cooked up a dazzling new idea for the exotic financial product known as credit derivatives That idea would rip around the banking world catapult Morgan to the top of the turbocharged derivatives trade and fuel an extraordinary banking boom that seemed to have unleashed banks from ages old constraints of risk But when the Morgan team's derivatives dream collided with the housing boom and was perverted through hubris delusion and sheer greed by titans of banking that included Citigroup UBS Deutsche Bank and Merrill Lynch catastrophe followed Tett's access to Dimon and the J P Morgan leaders who so skillfully steered their bank away from the wild excesses of others sheds invaluable light not only on the untold story of how they engineered their bank's escape from carnage but also on how possible it was for the larger banking world regulators and rating agencies to have spotted and heeded the terrible risks of a meltdown A tale of blistering brilliance and willfully blind ambition Fool's Gold is both a rare journey deep inside the arcane and wildly competitive world of high finance and a vital contribution to understanding how the worst economic crisis since the Great Depression was perpetrated The Socialism of Fools? Proceedings of the International Conference on Sustainable Collaboration in Business, Technology, Information, and Innovation (SCBTII 2024) Suhal Kusairi, Forget Mingiri Kapingura, Putri Fariska Sugestie, Nizam Ahmat, 2024-11-16 This is an open access book Global growth has lost momentum On average GDP growth has declined from more than 2% in advanced economies and nearly 6% in emerging and developing economies in the early 2000s to less than 1.5% and less than 2% post COVID period A succession of crises has compounded this sustained slowdown in growth It has been more than a decade since the beginning of the global financial crisis yet it continues to cast a shadow not least in the policy choices of many advanced economies The COVID 19 pandemic and the shock of lockdowns left behind an aftermath of a surge in public debt levels and a reversal of global development progress Geopolitical tensions and conflicts have further reshaped an increasingly multipolar international order with far reaching implications for technology growth and development Overshadowing these developments is the growing awareness that the world's rising temperature poses grave dangers to the long term prospects for humanity with the world currently on track for a temperature rise significantly above the targets set out in the Paris Agreement in 2015 The critical question for this pivotal moment is not whether the world still needs economic growth but how that growth is achieved and whether it is aligned with other important national and global priorities Against this backdrop universities are essential in educating and providing professional human resources and conducting high quality research that benefits humanity However universities must play a significant role and be innovative and creative in engaging and supporting the development opportunities and consolidation

of the global community To embark on this role effectively universities must always foster communication and discussion among stakeholders under the Sustainability Development Goals SDGs Academia Government Business and Communities must increasingly cooperate to achieve academic and research excellence and constructive solutions to current business and economic issues Sustainable Collaboration in Business Information and Innovation SCBTII 2024 is an international conference that brings together academics professionals entrepreneurs researchers learners and other associated groups from all over the world that are interested in theories as well as practices in the field of the digital economy for global competitiveness This conference provides opportunities for presenters and participants to exchange new ideas and experiences create research relationships and find international partners for future collaboration to respond to economic business social and technological development challenges successfully and effectively for better life and well being

Song of Fools Donald J. Richardson, 2006-02-27 I was inspired to write Song of Fools by an article I read about Oscar Hartzell As I read about him I wondered about the motivations of those Iowans Missourians Nebraskans and Kansans who gladly sent him money I determined that the type of faith that caused them to send him money is also the kind of faith that is found in bedrock religion It transcends analysis and must simply be accepted just as those poor Depression era Americans believed in Oscar Hartzell and the Drake fortune But what folly to listen to and heed the songs of fools The other songs are those which Harold sings and directs the other boys to sing These too in a way are songs of fools as we are all caught in this intricate web of life seeking meaning as we somehow muddle through May we ultimately discover the true music of life
