A Critical Introduction to the Epistemology of Perception Ali Hasan, 2017-02-23 We ordinarily take it as obvious that we acquire knowledge of our world on the basis of sensory perception and that such knowledge plays a central cognitive and practical role in our lives Upon reflection however it is far from obvious what perception involves and how exactly it contributes to our knowledge Indeed skeptical arguments have led some to question whether we have any knowledge or even rational or justified belief regarding the world outside our minds Investigating the nature and scope of our perceptual knowledge and perceptually justified belief A Critical Introduction to the Epistemology of Perception provides an accessible and engaging introduction to a flourishing area of philosophy Before introducing and evaluating the main theories in the epistemology of perception Ali Hasan sets the stage with a discussion of skepticism realism and idealism in early modern philosophy theories of perceptual experience

Epistemontology in Spinoza-Marx-Freud-Lacan A. Kiarina Kordela, 2017-10-06 A Kiarina Kordela steps beyond extant commentaries on Marx's theory of commodity fetishism from A Sohn Rethel to L Althusser Balibar Slavoj Žižek and others to show that in capitalism value is the manifestation of the homology between thought and being while their other aspect power is foreclosed and becomes the object of biopower Using monistic Marxian Lacanian structuralism as an alternative to dominant models from Plato and Kant to phenomenological accounts deconstruction and other contemporary approaches Kordela expertly argues that Marx's theory of commodity fetishism is a reformulation of the Spinozian thesis that thought mind and things bodies or extension are manifestations of one and the same being or substance Kordela's link between Spinoza and Marx shows that being consists of two aspects value and power the former leading to structuralist thought the latter becoming the object of contemporary biopower Epistemontology in Spinoza Marx Freud Lacan intervenes between two dominant lines of thought in the reception of Marx today on the one hand an approach that relates Marxian thought to psychoanalysis from a Hegelian dialectical perspective and on the other hand an approach that links Marxism to Spinozian monism at the total exclusion of psychoanalysis This book will interest scholars and researchers who study Marxism post structuralism psychoanalysis critical theory ontology epistemology and theories of representation theoreticians of cultural studies and comparative literature aesthetic theory including the relation of art to economy and politics and biopolitics

The Inconspicuous God Jason W. Alvis, 2018-06-01 Dominique Janicaud once famously critiqued the work of French phenomenologists of the theological turn because their work was built on the seemingly corrupt basis of Heidegger's notion of the inapparent or inconspicuous In this powerful reconsideration and extension of Heidegger's phenomenology of the inconspicuous Jason W Alvis deftly suggests that inconspicuousness characterizes something fully present and active yet quickly overlooked Alvis develops the idea of inconspicuousness through creative appraisals of key concepts of the thinkers of the French theological turn and then employs it to describe the paradoxes of religious experience

Linking Game-Theoretical Approaches with Constructive Type Theory Nicolas Clerbout, Shahid Rahman, 2015-07-08 This title links two of the most dominant research streams in philosophy of logic namely game theory and proof theory As the work's subtitle expresses the authors will build this link by means of the dialogical approach to logic One important aspect of the present study is that the authors restrict

themselves to the logically valid fragment of Constructive Type Theory CTT The reason is that once that fragment is achieved the result can be extended to cover the whole CTT system The first chapters in the brief offer overviews on the two frameworks discussed in the book with an emphasis on the dialogical framework The third chapter demonstrates the left to right direction of the equivalence result This is followed by a chapter that demonstrates the use of the algorithm in showing how to transform a specific winning strategy into a CCT demonstration of the axiom of choice The fifth chapter develops the algorithm from CTT demonstrations to dialogical strategies This brief concludes by introducing elements of discussion which are to be developed in subsequent work
