

A Starbucks employee, a woman with dark hair tied back, wearing a black Starbucks polo shirt and a green apron, is focused on her work. She is holding a small black object, possibly a coffee tamper or a small container, in her hands. In the background, other Starbucks employees in similar uniforms are visible, working in a coffee shop setting. The lighting is warm and focused on the employee in the foreground.

Сила звички. Чому ми діємо так, а не інакше в житті та бізнесі Чарлз Дахирр, Teaching Business Sustainability Chris Galea, 2017-11-28 In a world where corporate governance scandals have become the everyday the role of business schools in producing the managers of today and tomorrow has come into sharp focus Today s managers and the MBAs that will follow them are in need of an education that grounds business ethics and the overarching concerns of sustainable development into the curriculum As some but by no means all organisations are coming to realise bad performance in environmental protection labour practices and human rights is no longer a soft issue but one that can hit the bottom line with a vengeance So what is the state of the art in teaching business sustainability worldwide and what teaching practices and tools are achieving successful results This book begins to answer these questions and more There are many challenges facing educators in the field of sustainability It is an evolving field still in its infancy as a management discipline and there is also the need to combat the unstated but often underlying assumption that many environmental and social issues represent non valued added effort Teaching Business Sustainability acknowledges this problem while helping students explore the various ways in which the theoretical value of business sustainability can result in valuable and value added practical outcomes A wide mix of approaches is therefore indicated while many of these are

experimental and on the leading edge of management learning they all share an experiential and often a team based element and attempt to bring together the theory in a way that makes it relevant to practitioners in the field The implication is that whenever possible educators need to link the learning to the students immediate and pressing real world realities This applies equally to undergraduates or high level executives However in the absence of immediate examples of such realities as may often be the case in undergraduate settings educators need to introduce experientially based approaches that recreate such settings in the classroom The book also argues the case for holistic and interdisciplinary learning It is clear from much of the literature on sustainability that the concept does not easily lend itself to being pigeonholed and that it crosses many of the functional areas of business Indeed it goes beyond just business learning to encompass many fields such as ecology engineering and biology If students are to move beyond the narrow perspective that conventional business studies often entail they need to be introduced to the wider vision that an interdisciplinary approach engenders The final point that emerges from this collection is that experiential learning of business sustainability often can and should be fun Be it a heated exchange in a case study discussion a role play exercise or a hands on student consulting project much experiential learning seems to excite the imagination of the students and to release their creative juices The 23 contributions to Teaching Business Sustainability have been divided into three thematic groups In the first section Theory Critique and Ideas the authors explore and critique some of the overarching ideas and thinking behind the teaching of sustainability The next section Learning from Current Practice contains the experiences of a number of educators and the successful and leading edge approaches that they have used The final section then outlines tools methods and approaches that can be used to teach business sustainability This last section also serves as an introduction to a second volume Teaching Business Sustainability Vol 2 which provides educators of sustainability with a series of case studies role plays and experiential exercises Teaching Business Sustainability is an invaluable resource both for educators working in a wide range of academic disciplines looking for inspiration and guidance on how to teach business sustainability as well as for organisations looking to reinvigorate internal management education programmes to factor in corporate responsibility and sustainability issues
