1. How many excess electrons are on a sphere with a charge of $-9.20 \times 10^{-17} \text{ C}$?
2. Two charges, q_1 and q_2 , are separated by a distance, d , and exert a force, F , on each other. Identify what new force will exist if
 - a. q_1 is doubled and q_2 is cut in half.
 - b. q_1 is tripled and q_2 is doubled.
 - c. q_2 is cut in half and d is tripled.
3. An electric force of 0.030 N acts between two charges which are 7.2 cm apart. Calculate the force acting between the charges if the distance between them is reduced to 1.5 cm .
4. Two negative charges of $-24 \mu\text{C}$ each are separated by 6.0 cm . What force exists between the charges?
5. Two charged spheres are separated by 315 mm . What is the force between them if the charge on one sphere is $+9.6 \times 10^{-7} \text{ C}$ and the charge on the other sphere is $-2.2 \times 10^{-5} \text{ C}$?
6. Determine the electrostatic force of attraction between a proton and an electron that are separated by $7.5 \times 10^{-8} \text{ m}$.
7. A positive charge of $3.4 \times 10^{-7} \text{ C}$ exerts a repulsive force of 9.0 N on a second charge 4.0 cm away. Determine the second charge.
8. An attractive force of 0.87 N exists between a positive charge of $5.0 \mu\text{C}$ and a negative charge of $-1.5 \mu\text{C}$. What is the distance between the charges?
9. Two identical point charges exert a repulsive force of $6.0 \times 10^{-3} \text{ N}$ when separated by a distance of 6.5 cm . Calculate the charge of each.
10. Two positively charged spheres, A and B, are separated by 0.25 m . The charge on sphere A is one third the charge on sphere B. Find the charge on each sphere if the force of repulsion is 125 N .
11. Three particles are placed in a straight line. The left particle has a charge of $+2.0 \times 10^{-5} \text{ C}$, the middle particle has a charge of $-4.0 \times 10^{-6} \text{ C}$, and the right particle has a charge of $+3.0 \times 10^{-5} \text{ C}$. The left particle is 56 mm from the middle particle and the right particle is 42 mm from the middle particle. Find the net force on the left particle.
12. A positive charge of $23 \mu\text{C}$ is 15 cm directly north of a positive charge of $38 \mu\text{C}$. A third positive charge of $71 \mu\text{C}$ is 45 cm directly west of the $38\text{-}\mu\text{C}$ charge. Determine the net force on the $38\text{-}\mu\text{C}$ charge.

Supplementary Material and Solutions Manual for Mathematical Modeling in the Environment Charles R. Hadlock, 2020-05-05 This manual is meant to provide supplementary material and solutions to the exercises used in Charles Hadlock's textbook *Mathematical Modeling in the Environment*. The manual is invaluable to users of the textbook as it contains complete solutions and often further discussion of essentially every exercise the author presents in his book. This includes both the mathematical/computational exercises as well as the research questions and investigations. Since the exercises in the textbook are very rich in content rather than simple mechanical problems and cover a wide range, most readers will not have the time to work out every one on their own. Readers can thus still benefit greatly from perusing solutions to problems they have at least thought about briefly. Students using this manual still need to work out solutions to research questions using their own sources and adapting them to their own geographic locations or to numerical problems using their own computational schemes, so this manual will be a useful guide to students in many course contexts. Enrichment material is included on the topics of some of the exercises. Advice for teachers who lack previous environmental experience but who want to teach this material is also provided and makes it practical for such persons to offer a course based on these volumes. This book is the essential companion to *Mathematical Modeling in the Environment*.

Resources for Teaching Middle School Science Smithsonian Institution, National Academy of Engineering, National Science Resources Center of the National Academy of Sciences, Institute of Medicine, 1998-04-30 With age appropriate inquiry centered curriculum materials and sound teaching practices, middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them. *Resources for Teaching Middle School Science* developed by the National Science Resources Center (NSRC) is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8. The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards. This completely new guide follows on the success of *Resources for Teaching Elementary School Science*, the first in the NSRC series of annotated guides to hands-on inquiry centered curriculum materials and other resources for science teachers. The curriculum materials in the new guide are grouped in five chapters by scientific area: Physical Science, Life Science, Environmental Science, Earth and Space Science, and Multidisciplinary and Applied Science. They are also grouped by type: core materials, supplementary units, and science activity books. Each annotation of curriculum material includes a recommended grade level, a description of the activities involved and of what students can be expected to learn, a list of accompanying materials, a reading level, and ordering information. The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National Science Education Standards. The annotations designate the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the

guide contains six chapters of diverse resources that are directly relevant to middle school science Among these is a chapter on educational software and multimedia programs chapters on books about science and teaching directories and guides to science trade books and periodicals for teachers and students Another section features institutional resources One chapter lists about 600 science centers museums and zoos where teachers can take middle school students for interactive science experiences Another chapter describes nearly 140 professional associations and U S government agencies that offer resources and assistance Authoritative extensive and thoroughly indexed and the only guide of its kind Resources for Teaching Middle School Science will be the most used book on the shelf for science teachers school administrators teacher trainers science curriculum specialists advocates of hands on science teaching and concerned parents
