

CHAPTER 10 REVIEW*States of Matter***SECTION 1****SHORT ANSWER** Answer the following questions in the space provided.

1. Identify whether the descriptions below describe an ideal gas or a real gas.

- _____ **ideal gas** a. The gas will not condense because the molecules do not attract each other.
- _____ **ideal gas** b. Collisions between molecules are perfectly elastic.
- _____ **real gas** c. Gas particles passing close to one another exert an attraction on each other.

2. The formula for kinetic energy is $KE = \frac{1}{2}mv^2$.

- a. As long as temperature is constant, what happens to the kinetic energy of the colliding particles during an elastic collision?

The energy is transferred between them.

- b. If two gases have the same temperature and share the same energy but have different molecular masses, which molecules will have the greater speed?

Those with the lower molecule mass.

3. Use the kinetic-molecular theory to explain each of the following phenomena:

- a. A strong-smelling gas released from a container in the middle of a room is soon detected in all areas of that room.

Gas molecules are in constant, rapid, random motion.

- b. As a gas is heated, its rate of effusion through a small hole increases if all other factors remain constant.

As a gas is heated, each molecule's speed increases; therefore, the molecules pass through the small hole more frequently.

4. a. b, d, c, a List the following gases in order of rate of effusion, from lowest to highest. (Assume all gases are at the same temperature and pressure.)

(a) He (b) Xe (c) HCl (d) Cl₂

Narrative Life Neil Hooley, 2009-04-29 Indigenous education is one of the great challenges facing humanity in the historic quest for a democratic and peaceful future The 370 million Indigenous peoples of the world demand that the racist and colonial wrongs of the past be rectified and that they stand as equals in confronting the social political and cultural problems that surround us all Education offers a way forward whether concerned with the public good schooling for all citizens including universal primary education and expanding secondary education the education of women regardless of background the inclusion of local cultures literacy and numeracy for all as a democratic right and the provision of comprehensive education that enables both personal aspiration cultural satisfaction and economic pathways What this means is that all children no matter where they live no matter what

their background or the colour of their skin should expect to have access to education of the highest quality This does not impose a particular style of education for local communities but respects that educational directions must be decided independently by countries themselves Within this general context there is also something most profound about Indigenous knowing of appreciating Indigenous perspectives and applying these across all knowledge across all subjects of a curriculum Rather than accepting the one often highly conservative and dominant view of knowledge teaching and learning for all schools Indigenous perspectives offer other insights and means of analysis reflection and critique These can open up fields of creative and critical learning for all children including the dispossessed marginalised and disenfranchised
