

STATIC ELECTRICITY!

Introduction:

Hey everyone! How are you all? Today we are going to start static electricity. First of all, have you girls ever wondered why your hair get attracted to the sweaters you wear in winters? It's because when your hair get rubbed with the sweater, they acquire static electric charges and become charged. This shows that friction from rubbing can cause an object to be charged or electrified.

Electrostatic Charging by Friction:

Electrostatics is the study of static charges, just like the case of hair we just discussed. Some objects like duster and polythene will acquire electric charges when they are rubbed together. How do they acquire the charges? This happens because the electrons are transferred from one object to another.

For example, take a look at the diagram below. The duster is rubbed with the polythene as shown. Initially, before rubbing, both have equal negative and positive charges, that is, they are neutral. After rubbing, the duster becomes positively charged while the polythene becomes negatively charged i.e. the duster has lost electrons and of course, polythene has gained it.

How are these charges transferred by friction?

Let's get into more detail of what's happening. We all know that all matter is made up of tiny particles called atoms. And we know the composition of an atom: it consists of negatively charged electrons, positively charged protons and neutral (uncharged) particles called neutrons. The number of electrons and protons is equal which causes the atom to be neutral.

What will happen if, somehow, the charges are unbalanced? As in the number of electrons and protons is not equal. The atom will carry some charge, right? If you are thinking of how the number of electrons and protons can be different, it can occur when electrons are added or removed from the atom (protons are never added or removed, they lie within the nucleus) such that when electrons are added, the atom will carry negative charge and viceversa. Such an atom which is charged is called an ion.

As we saw, in case when the duster was rubbed with the polythene, what happens is the atoms at the surface are disturbed and some electrons from the surface atoms of one object (duster in this case) are transferred to the other object (that is polythene).

Notice that the electric charge is not created or destroyed: it is only transferred!

Electric charge is measured in Coulombs (C), no matter if its negative or positive. The amount of charge on an electron is 1.6×10^{-19} C, indeed a very small charge.

Fervent Physics (Study Guide) Pasquale De Marco, 2025-05-21 Are you fascinated by the world around you Do you want to understand the fundamental principles that govern the universe Then this book is for you Fervent Physics Study Guide is a comprehensive and engaging guide to the world of physics Written in a clear and concise style this book is perfect for students teachers and anyone else who wants to learn more about the wonders of physics This book covers all the essential topics in physics from the basic concepts of motion energy and force to the more complex topics of electricity magnetism and heat You ll also learn about the cutting edge fields of atomic and nuclear physics Along the way you ll meet the great physicists who have made significant contributions to our understanding of the universe and you ll see how physics is used in our everyday lives With its clear explanations helpful examples and stunning illustrations Fervent Physics Study Guide is the perfect resource for anyone who wants to learn more about the fascinating world of physics

Key Features
Comprehensive coverage of all the essential topics in physics
Written in a clear and concise style perfect for students and teachers
Packed with interesting examples and illustrations
Explores the cutting edge fields of atomic and nuclear physics
Shows how physics is used in our everyday lives
Whether you re a student a teacher or simply someone who is curious about the world around you Fervent Physics Study Guide is the perfect book for you
