Grammaticalization Scenarios from Europe and Asia Walter Bisang, Andrej Malchukov, 2020-09-21 This volume intends to fill the gap in the grammaticalization studies setting as its goal the systematic description of grammaticalization processes in genealogically and structurally diverse languages. To address the problem of the limitations of the secondary sources for grammaticalization studies the editors rely on sketches of grammaticalization phenomena from experts in individual languages guided by a typological questionnaire.

A History of Russian Literature Andrew Kahn, Mark Lipovsky, Irina Reyfman, Stephanie Sandler, 2018-04-13 Russia possesses one of the richest and most admired literatures of Europe reaching back to the eleventh century. *A History of Russian Literature* provides a comprehensive account of Russian writing from its earliest origins in the monastic works of Kiev up to the present day, still rife with the creative experiments of post-Soviet literary life. The volume proceeds chronologically in five parts extending from Kievan Rus in the 11th century to the present day. The coverage strikes a balance between extensive overview and in-depth thematic focus. Parts are organized thematically in chapters which a number of keywords that are important literary concepts that can serve as connecting motifs and case studies in depth discussions of writers, institutions and texts that take the reader up close and personal. Visual material also underscores the interrelation of the word and image at a number of points particularly significant in the medieval period and twentieth century. The History addresses major continuities and discontinuities in the history of Russian literature across all periods and in particular brings out trans-historical features that contribute to the notion of a national literature. The volume's time range has the merit of identifying from the early modern period a vital set of national stereotypes and popular folklore about boundaries, space, Holy Russia and the charismatic king that offers culturally relevant material to later writers. This volume delivers a fresh view on a

series of key questions about Russia's literary history by providing new mappings of literary history and a narrative that pursues key concepts rather than individual authorial careers. This holistic narrative underscores the ways in which context and text are densely woven in Russian literature and demonstrates that the most exciting way to understand the canon and the development of tradition is through a discussion of the interrelation of major and minor figures, historical events and literary politics, literary theory and literary innovation.

A Corpus-Driven Approach to Language Contact Evangelia Adamou, 2016-01-29. This book proposes a corpus-driven approach to language contact based on the study of endangered languages. Drawing on variationist and language contact frameworks, it presents an analysis of spoken corpora from Europe and Mexico using a combination of criteria. The aim of this approach is to establish patterns of multilingual speech prevailing in different communities and allow for crosslinguistic comparison.

The Changing Languages of Europe Bernd Heine, Tania Kuteva, 2006-06-22. The languages and dialects of Europe, this book shows, are becoming increasingly alike. Furthermore, this unifying process goes at least as far back as the Roman empire, is accelerating and affects every one of Europe's 150 or so languages, including those of different families such as Basque and Finnish. The changes are by no means restricted to lexical borrowing but involve every grammatical aspect of the language. They are usually so minute that neither native speakers nor trained linguists notice them. But they accumulate and give rise to new grammatical structures that lead in turn to new patterns of areal relationship. Professor Heine and Professor Kuteva look for the causes of linguistic change in cultural and economic exchanges across national and regional boundaries and in the processes that occur when speakers learn or are in close contact with another language. Testing their data and conclusions against findings from elsewhere in the world, the authors reconstruct and reveal when, how and why common grammatical structures have evolved and continue to evolve in processes of change that will, they argue, transform the linguistic landscape of Europe. The book is written in clear, non-technical language. It will appeal to scholars and students of language change and variation in Europe and elsewhere. It will also interest everyone concerned to understand the nature of language and language change.

Typology of Resultative Constructions Vladimir P. Nedjalkov, Bernard Comrie, 1988-01-01. This volume, originally published in Russian,

combines data from a wide range of languages meticulously analyzed with a sophisticated theoretical apparatus capable of isolating the most important syntactic and semantic parameters and of drawing those generalizations that are most significant from a cross linguistic perspective Many ideas which are at best only hinted at in earlier literature such as the precise relation among resultative perfect and stative or correlations between resultative and passive voice are here for the first time stated precisely and given a firm foundation by means of detailed exemplification from a wide range of languages

Gattungen und Genologie der slavisch-orthodoxen Literaturen des Mittelalters Klaus-Dieter Seemann, 1992 *How Germans and Russians Made Their Orthographies* Kirill Levinson, 2023-11-15 *How Germans and Russians Made Their Orthographies* Dealing With the Spelling Distress is the first social constructionist study of spelling norms and spelling mistakes Starting from the question of why in the modern world misspelling is considered evidence of incompetence laziness stupidity or carelessness Kirill Levinson traces the origins of such attitudes in German and Russian societies of the nineteenth and early twentieth centuries Analyzing publications and archival sources this book illustrates how the unification and codification of spelling rules in Germany and repressive attitude to errors were the result of the increased value ascribed to accuracy unambiguity and error freeness in the economy and everyday life The critical context to the development of such attitudes can be found in the challenges of the industrial revolution the political reaction following 1848 upheavals and the development of national school systems that used formalized grading and combined the academic training and moral education of schoolchildren In Russia the borrowing of Prussian models during the school reform of the 1860s played a key role to a similar repressive attitude towards spelling mistakes The rigorous orthographic regime established in the second half of the nineteenth century persisted for many decades even though alternative solutions were proposed to overcome the significant problems that the inconsistencies of German and Russian orthographies posed optimizing the rules to make them easier to learn and follow moving from alphabetical writing to shorthand and liberalizing school *Das „Corpus Tibullianum“ in Russland* Constanze Wünscher, 2017-03-17 *Das Corpus Tibullianum* gelangt im 18 Jahrhundert ber die franz sische Literatur in das Blickfeld russischer Dichter bersetzer Eine wahre Bl tezeit erlebt die produktive russische Tibull

The Syntax of the Be-possessive Hakyung Jung,2011 This book is the first attempt to provide a unified account of the be possessive syntax and its extension to the modal and the perfect constructions in Russian North Russian within a generative framework Apparently diverse constructions are construed as deriving from the have be parameter which depends on the utilization of the prepositional complementizer with a Case feature The be perfect structure provides an adequate environment where ergativity is encoded via verbal nominalization The relevance of the be perfect structure for a split ergative pattern shows that the ergative system is a syntactically conditioned phenomenon rather than a purely morphological diversity This volume also offers the diachronic study of the be syntax investigating the evolution of the be perfect and be modal constructions which has rarely been explored within a formal framework Concrete scenarios are proposed for the developmental paths of the be perfect and the be modal constructions based on textual evidence in old North Russian

Modes of Modality Elisabeth Leiss,Werner Abraham,2014-01-15 The volume aims at a universal definition of modality or illocutionary speaker s perspective force that is strong enough to capture the entire range of different subtypes and varieties of modalities in different languages The central idea is that modality is all pervasive in language This perspective on modality allows for the integration of covert modality as well as peripheral instances of modality in neglected domains such as the modality of insufficiency of attitudinality or neglected domains such as modality and illocutionary force in finite vs nonfinite and factive vs non factive subordinated clauses In most languages modality encompasses modal verbs both in their root and epistemic meanings at least where these languages have the principled distribution between root and epistemic modality in the first place which is one fundamentally restricted in its strict qualitative and quantitative sense to the Germanic languages In addition this volume discusses one other intricate and partially highly mysterious class of modality triggers modal particles as they are sported in the Germanic languages except for English It is argued in the contributions and the languages discussed in this volume how modal verbs and adverbials next to modal particles are expressed how they are interlinked with contextual factors such as aspect definiteness person verbal factivity and assertivity as opposed to other attitudinal types An essential concept used and argued for is perspectivization a sub concept of possible world semantics Language groups covered in detail and compared are Slavic Germanic and South East Asian The volume will interest researchers in theoretical and applied linguistics typology the semantics pragmatics interface and language philosophy as it is part of a larger project developing an alternative approach to Universal Grammar that is compatible with functionalist approaches

Brjusov und die Zeitgeschichte Sabina Siwczyk-Lammers,2002 Der russische Symbolist V Ja

Brjusov prägte die zeitgenössische Literatur in vielfältiger Weise als Dichter und Romanautor als Versteoretiker und Vordenker im Bereich der ästhetischen Konzeption als Vermittler moderner europäischer Literaturen in Russland und nicht zuletzt als engagierter Mitgestalter des literarischen Lebens zu Beginn des 20. Jahrhunderts. Im Mittelpunkt der Arbeit stehen seine zeitgeschichtlichen Gedichte, die im Laufe eines Vierteljahrhunderts verfasst wurden. Brjusov thematisiert bedeutende historische Ereignisse und Entwicklungen jener Zeit wie den Russisch-Japanischen Krieg von 1904/05, die Russische Revolution von 1905, den Ersten Weltkrieg, die Februar- und die Oktoberrevolution von 1917 sowie aktuelles Tagesgeschehen wie das Urteil in der Dreyfus-Affäre 1899, die Pressekampagne gegen Gorki im Juli 1917 oder Lenins Tod 1924. Das Hauptaugenmerk gilt der Analyse der künstlerischen Mittel und Verfahren, besonders auf der metrisch-rhythmischen und bildlich-symbolischen Ebene. Auf diese Weise wird die durchaus ambivalente und widersprüchliche Gestaltung und Deutung von konkreten Fakten und gesellschaftspolitischen Entwicklungen im Hinblick auf die Transzendenz erschlossen.

The Syntax of the Be-Possessive Hakyung Jung, 2011-05-18. This book is the first attempt to provide a unified account of the be possessive syntax and its extension to the modal and the perfect constructions in Russian North Russian within a generative framework. Apparently diverse constructions are construed as deriving from the have-be-parameter, which depends on the utilization of the prepositional complementizer with a Case feature. The be-perfect structure provides an adequate environment where ergativity is encoded via verbal nominalization. The relevance of the be-perfect structure for a split ergative pattern shows that the ergative system is a syntactically conditioned phenomenon rather than a purely morphological diversity. This volume also offers the diachronic study of the be-syntax, investigating the evolution of the be-perfect and be-modal constructions, which has rarely been explored within a formal framework. Concrete scenarios are proposed for the developmental paths of the be-perfect and the be-modal constructions based on textual evidence in old North Russian.

Perspectives on Language Structure and Language Change Lars Heltoft, Iván Igartua, Brian D. Joseph, Kirsten Jeppesen Kragh, Lene Schøsler, 2019-06-15. This volume centers on three important theoretical concepts for the study of language change and the ways in which language structure emerges and turns into new structure: reanalysis, actualization, and indexicality. Reanalysis is a part of ongoing everyday language use, a process through which language is reproduced and changed. Actualization refers to the processes through which a reanalyzed structure spreads throughout single communities and society. Indexicality covers the way in which parts of a linguistic system can point to other parts of the system, both syntagmatically and paradigmatically. The inclusion of indexicality leads to fine-grained analysis in morphology, word order, and constructional syntax.
