

Installation instructions for a multi-point lock mechanism. There are many types of multi-point locks, these instructions will apply to most but not all locks. Generally, double spindle locks are not compatible. If in doubt, get in touch. The Slimline lock will fit doors between 1.57" and 3" in thickness, for 3" to 4", purchase a spigote extension kit.

OVERVIEW

The keyed lock is secured by two bolts that fit through the door. The bottom bolt can use the existing hole below the euro cylinder. The top bolt & cable might require new holes.

STEP 1

With the door closed, measure from the centre of the handle to the edge of the door top. It must be at least 0.80" to ensure the smart lock will fit on the door.

STEP 2

Open the door and remove the existing handle and euro cylinder lock. The euro cylinder is not required as the Slimline has a built in key over ride. Leave the spindle in place.

STEP 3

Apply masking tape to both sides of the door and mark the position of the spindle. Move the door so the keypad will align on the door. The top and bottom bolts and cable position are adjustable.

STEP 4

Remove the multi-point mechanism from the door and key plate. Align the lock case. Two holes are required, 3" hole for the cable and a 0.39" hole for the top bolt. The holes should be above the lock case but align with the sliding recess on the lock. In this instance we will position the cable at 3" and the top bolt hole at 4".

STEP 5

Mark these measurements on both sides of the door. We can use one of the existing holes for the cable but we need to increase the size of the cable hole.

STEP 6

Drill the holes from both sides of the door. BOLT HOLES - 0.39" hole. CABLE & SPINDLE - 1" holes. The hole for the spindle should be increased to 1". The cable hole needs to allow for any excess cable to be pushed back in the frame cavity.

STEP 7

Remove the masking tape from the door. Fit the multi-point lock mechanism back into the door.

STEP 8

Check that the handles are facing the correct direction. If not insert the turn allen key, unscrew fully and turn the handle 180 degrees and tighten.

IMPORTANT - even if you don't need to change the handle direction, insert the allen key and check the bolts are fully tightened.

STEP 9

IMPORTANT - Make sure that the arrow on the spigote extension faces the handle.

Select the correct length spigote	Spigote
Door thickness	
1.57" to 1.96"	3.56"
1.96" to 2.36"	2.53"
2.36" to 2.75"	2.53"
2.75" to 3.54"	3.54"

STEP 10

Fit the correct length spindle and clip that secures the spindle. Insert the two brass threaded studs, these go with the short flat head bolts. They slide along the recesses making alignment easier. Adjust so they line up with the holes in the door, then tighten fully. Fit the rubber gasket.

STEP 11

Offer up the keypad to the door. Make sure that both studs are aligned properly and tight. Locate the spindle through the lock case. Feed the cable through the door cavity to the other side. Make sure the cable does not bend back on itself.
