Religious Transformation in Western Society (Routledge Revivals) Harvie Ferguson, 2010-12 Originally published in 1992 this remarkable book challenges many of the assumptions governing the Sociology of Religion and the Sociology of Culture by arguing that Western religion is neither science nor morality it is the promise of happiness Learned and incisive it will be essential reading for students of religion culture and anyone interested in the character of Modernity

Critics of Society (Routledge Revivals) Tom B. Bottomore, 2013-05-13 First published in 1967 this essay in the interpretation of radical social thought deals mainly with the radical theorists rather than the doctrines of social and political movements but makes an exception in an important discussion of the new radicalism of the 1960s The author's main concern is to lay bare the connections between intellectual dissent and theories of society and in so doing to explore the neglected subject of the heritage of American radical thinking Readers of this book will not only emerge enlightened by Professor Bottomore's impressive knowledge of American radical thought but with a greatly increased understanding of contemporary American history He ends with the question of whether the new radicalism can find a firmer basis than the student movement or the negro revolt can produce an ideology both responsive to the doubts and complexities of our time and capable of directing action to plausible ends

Will Not Return Void John Allen Dearing, 2021-10-28 When one considers the early Christian church one is immediately struck by the exponential growth that the church experienced The inevitable question one must ask when considering the early church's rapid rate of growth is How did it happen While social forces plagues politics and ideology competitions were certainly factors in the growth of

Christianity one would be remiss not to consider the methodology behind the considerable evangelistic effort made by the patristic church This dissertation analyzes the use of Scripture in the apologetic and evangelistic writings produced by Christian leaders within the Greek patristic tradition and their belief that Scripture was the primary tool given by God for the conversion of souls *Religion and Sexuality* Lawrence Foster,1981 Most writers have treated these three groups and the social ferment out of which they grew as simply an American sideshow In this book therefore I have attempted to go beyond the conventional focus on what these groups did I have also sought to explain why they did what they did and how successful they were in terms of their own objectives By trying sympathetically to understand these extraordinary experiments in social and religious revitalization I believe it is possible to come to terms with a broader set of questions that affect all men and women during times of crisis and transition From the preface Winner of the Best Book Award Mormon History Association

The Ethics of Neoliberalism Peter Bloom,2017-06-26 The 21st century is the age of neo liberalism a time when the free market is spreading to all areas of economic political and social life Yet how is this changing our individual and collective ethics Is capitalism also becoming our new morality From the growing popular demand for corporate social responsibility to personal desire for work life balance it would appear that non market ideals are not only surviving but also thriving Why then does it seem that capitalism remains as strong as ever The Ethics of Neoliberalism boldly proposes that neoliberalism strategically co opts traditional ethics to ideologically and structurally strengthen capitalism It produces the ethical capitalist subject who is personally responsible for making their society workplace and even their lives more ethical in the face of an immoral but seemingly permanent free market Rather than altering our morality neoliberalism individualizes ethics making us personally responsible for dealing with and resolving its moral failings In doing so individuals end up perpetuating the very market system that they morally oppose and feel powerless to ultimately change This analysis reveals the complex and paradoxical way capitalism is currently shaping us as ethical subjects People are increasingly asked to ethically save capitalism both collectively and personally This can range from the moral responsibility to politically accept austerity following the financial crisis to the willingness of employees to sacrifice their time and energy to make their neoliberal organizations more humane to the efforts by individuals to contribute to their family and communities despite the pressures of a frantic global business environment Neoliberalism thus uses our ethics against us relying on our good nature and sense of personal responsibility to reduce its human cost in practice Ironically **Spiritual Home** Charles D.

Cashdollar,2010-11-01 A Spiritual Home explores congregational life inside British and American Reformed churches between 1830 and 1915 At a time when scholars have become interested in the day to day experience of local congregations this book reaches back into the nineteenth century a critically formative period in Anglo American religious life to examine the historical roots of congregational life Taking the perspective of the laity Cashdollar ranges widely from worship and music to fund raising and administration from pastoral care to social work from prayer meetings to strawberry festivals from

the sanctuary to the kitchen Firmly rooted in broader currents of gender class notions of middle class respectability increasing expectations for personal privacy and patterns of professionalization he finds that there was a gradual shift in emphasis during these years from piety to fellowship Based on records publications and memorabilia from about 150 congregations representing eight denominations A Spiritual Home gives us a comprehensive composite portrait of religious life in Victorian Britain and America

Intrusions Hilary Evans,2023-02-15 First published in 1982 Intrusions examines a wide range of cases down through history showing how ordinary people have regarded the paranormal in contrast with official attitudes and how society as a whole has attempted to deal with happenings that are inexplicable in terms of current scientific or religious theory He discusses questions such as What did Shakespeare s audience feel about Hamlet s father s ghost Why did a renewed interest in magic follow the age of enlightenment How did Victorian science respond to spiritualism and why has scientific psychical research when it finally came encountered continued opposition Drawing on reports and accounts of very kind Mr Evans gives an authentic account of prevailing attitudes focussing for the first time directly on the experiences and points of view of ordinary people He demonstrates that society has been and still is badly served by the intellectual establishment in matters relating to the paranormal Although there are signs that the situation is improving there is still a dismaying degree of reluctance even to investigate let alone accept these phenomena yet they continue to occur and people continue to seek explanations for them This book will be of interest to anyone interested in the mysteries of the paranormal as well as to students of parapsychology history and literature

Spiritualism and the Foundations of C. G. Jung's Psychology F. X. Charet,2015-04-17 Charet uncovers some of the reasons why Jung s psychology finds itself living between science and religion He demonstrates that Jung s early life was influenced by the experiences beliefs and ideas that characterized Spiritualism and that arose out of the entangled relationship that existed between science and religion in the late nineteenth century Spiritualism following its inception in 1848 became a movement that claimed to be a scientific religion and whose controlling belief was that the human personality survived death and could be reached through a medium in trance The author shows that Jung s early experiences and preoccupation with Spiritualism influenced his later ideas of the autonomy personification and quasi metaphysical nature of the archetype the central concept and one of the foundations upon which he built his psychology

Place Based Approaches to Sustainability Volume I Mara Del Baldo,Maria-Gabriella Baldarelli,Elisabetta Righini,2024-02-22 Without respecting and nurturing place we cannot achieve a state of ecological sustainability Place based organizations are not run on a purely materialistic basis The non materialistic features of a place its aesthetics cultural heritage community feelings transcendence should be integrated into sustainability management This far reaching two volume work breaks with the economic logic of efficiency and profit maximization and suggests that organizations should inform their sustainability by encompassing feelings of identity with and attachment to place According to this vision the editors have compiled scholarly contributions aimed to support the ecological transformation of humankind

by exploring both theoretical and practical models that integrate the sense of the place ethics and spirituality in new ways of organizing of economic and social life This first volume sets the theoretical direction of the volumes asking broad aesthetic questions around the ethical and spiritual foundations of sustainability It will be of interest to scholars practitioners and students of sustainability business ethics and spirituality **Yale Historical Publications** ,1974 *Korean Spirituality* Don Baker,2008-04-01 Korea has one of the most dynamic and diverse religious cultures of any nation on earth Koreans are highly religious yet no single religious community enjoys dominance Buddhists share the Korean religious landscape with both Protestant and Catholic Christians as well as with shamans Confucians and practitioners of numerous new religions As a result Korea is a fruitful site for the exploration of the various manifestations of spirituality in the modern world At the same time however the complexity of the country s religious topography can overwhelm the novice explorer Emphasizing the attitudes and aspirations of the Korean people rather than ideology Don Baker has written an accessible aid to navigating the highways and byways of Korean spirituality He adopts a broad approach that distinguishes the different roles that folk religion Buddhism Confucianism Christianity and indigenous new religions have played in Korea in the past and continue to play in the present while identifying commonalities behind that diversity to illuminate the distinctive nature of spirituality on the Korean peninsula *Spiritual Healing* Fraser Watts,2011-01-06 There has recently been much interest in the relationship between science and religion and how they combine to give us a binocular perspective on things One important phenomenon which has been neglected in recent work is the concept of spiritual healing This edited collection explores a variety of approaches to spiritual healing from different religious points of view identifying both what it is and how it works The authors also explore the biological and psychological processes open to scientific enquiry through which healing may be mediated As such this book indicates the central proposition that religious and scientific perspectives answer different questions about healing and there is not necessarily any conflict between them *Religious Transformation in Western Society* (Routledge Revivals) Harvie Ferguson,2010-12-01 Originally published in 1992 this remarkable book challenges many of the assumptions governing the Sociology of Religion and the Sociology of Culture by arguing that Western religion is neither science nor morality it is the promise of happiness Learned and incisive it will be essential reading for students of religion culture and anyone interested in the character of Modernity **Men, Masculinities and Religious Change in Twentieth-Century Britain** L. While most of the literature in the field looks at this religious tradition in terms of its alleged inability to come to terms with modernity due to its specific religious institutions practices and dogma this book takes a step back from such Western centered and Protestant biased analysis of religion It addresses Orthodoxy s recent encounter with the West modernity and secularization in the process of post communist migrations from Eastern Europe revealing the complicated identity redefinition and re compositions of a religious group that highly values continuity tradition and ethnic national belonging Using socio anthropological qualitative research on Romanian Russian Greek and Serbian Orthodox migrants in Western Europe in a comparative perspective this volume grasps the interplay between the institutional and the individually lived aspects of religion in their relation to the increasingly secular conditions of belief in Western European host countries This book is important for those studying or researching Orthodox Christianity religion and migration secularization and modernity as well as those in related disciplines such as sociology anthropology of religion religious studies political science migration studies and cultural studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution CC BY 4.0 license
