Spotlight On Breast Cancer:

A Day in the Life Breast Cancer Care, 2012 **Greetings from Cancerland** Alysa Cummings, 2012-04-18 Shortly after Alysa Cummings was diagnosed with breast cancer she sat down at her laptop computer and began keeping a journal Over the two years of her cancer treatment Alysa continued writing as she moved through the healthcare delivery system I fantasized that I could somehow use my computer to craft a story with an upbeat next chapter or fairy tale happily ever after ending Looking back that's the only explanation I can come up with why I felt so compelled to create a record of my day to day experiences as a cancer patient The one thing I could control were these words that crowded each other as they quickly appeared on my computer screen these stories that flowed through my fingertips in such a manic rush these traumatic adventures that happened to me in a place I began to call CancerLand CancerLand it's this parallel universe I swear separate and apart from the rest of life as I once knew it How did I end up in this wacky Bizarro World filled with freaky language and even stranger rituals Gradually her daily journal entries became vignettes and poems that were published on the OncoLink website Greetings from CancerLand a collection of Alysas writing from 2002-2012 charts one breast cancer survivor's journey as she discovers the power of writing to move her recovery forward **The Complete Idiot's Guide to Total Nutrition, 4th Edition** Joy Bauer, 2005-11-01 Good health starts with good nutrition With all the constant debate over diet fads proper nutrition is slipping through the cracks This revised and updated guide places the emphasis on good health by informing families of everything they need to know to get the best nutrition from daily vitamin and mineral intake and facts about fats and cholesterol to advice on shopping for healthy foods and much more Includes updates to the USDA's Food Guide Pyramid New numbers for blood pressure and sodium intake A section on helping overweight children New fiber recommendations for kids A new section on macrobiotics and raw diets *NCCR Reporter*, 1997 **Spotlight on Breast Cancer** Applied Research Press, James Bonnar, 2014-12-01 Breast cancer is the most common cancer type in women worldwide with around 1.5 million new cases diagnosed every year Despite the high incidence advances in detection and treatment in recent years mean that more women than ever are surviving breast cancer with an 89% 5 year survival rate in Western countries Although men can also be affected male breast cancer is very rare accounting for less than 1% of all cancer in men Advances in molecular subtyping of breast cancer and the development of targeted therapies have greatly impacted breast cancer survival rates and many clinical trials are now underway to determine the best therapeutic strategy for those with different types of breast cancer as well as in the pre and post surgical setting Although breast cancer risk increases greatly with age around 7% of all cases occur in women under 40 and there are unique issues facing younger women with breast cancer such as long term treatment effects and the impact on fertility As people are living longer with breast cancer clinicians are increasingly recognizing the impact of disease prognosis and treatment on quality of life with ongoing efforts aimed at defining the optimal treatment strategy for individual patients This book aims to highlight the latest progress in breast
