Installing, Upgrading and Maintaining Oracle E-Business Suite Applications Release 11. 5. 10+ (or, Teaching an Old Dog New Tricks - Release 11i Care and Feeding Barbara Matthews,John Stouffer,Karen Brownfield,2007 Installing Upgrading and Maintaining Oracle E Business Suite Applications Release 11 5 10 is OnCallDBA and Solution Beacon s latest collaboration Topics include Release 11i Concepts and Architecture Oracle10g Installing Release 11i Upgrading or Migrating to Release 11i Maintaining Release 11i Administering Release 11i Securing Release 11i Setting Up the Concurrent Manager Using the Concurrent Manager Release 11i Reporting and Tuning and Troubleshooting Co authored by Barbara Matthews John Stouffer Randy Giefer Karen Brownfield Jeff Holt James Morrow Bruno Coon Tim Sharpe and Faun deHenry this book covers Oracle10g and E Business Release 11 5 10 **Access 2007 Pure SQL** Pindaro E. Demertzoglou,2009-06-30 This book provides the database professional and power user with working solutions for daily business tasks The goal has been to reduce needless writing and concentrate on the daily needs of database usage and development An efficient database professional does not need a book to tell him or her how to execute a query or how many types of queries Access 2007 supports the answers are a click away in the help file or online What power users and developers need is thought out solutions to show them the way to achieve their difficult tasks without having to look around for hours days or sometimes weeks In addition they need a book to show them when something is possible when it is not how many ways exist to achieve a task and which one is the most efficient Furthermore the table of contents is not arranged by topic tables queries reports etc but by solution The content of the book should be practical and the layout should help the professional find what he or she needs in seconds Learn how to use your databases for real business tasksPindar has worked on hundreds of business databases and operational systems for the last 18 years In this book he provides actual scenarios and code you can use in your daily business situations Actually you will get many ideas of how to employ Access 2007 to get data in ways you were not aware it was possible Some examples especially in the beginning of each chapter are quite simple so that readers with

less Access experience can follow and learn but they are definitely not simplistic Leave superfluous theory on the side and focus on the essence of your operations You might be taught a thousand pieces of theory and politically correct techniques on databases In the end what you will need is a way to accomplish your task This book will show you exactly the concepts you should learn and expand on them in detail Theory is present but only to support a practical technique not for the sake of it Concentrate on holistic solutions and not clustered technical skills This book leaves behind the classical format of texts Instead of providing multiple and isolated concepts it combines the necessary techniques to arrive to a real world solution For example instead of just showing what a date function is it demonstrates how it can be used in combination with clauses and other functions to obtain order processing cycle times or order fulfillment goals for your corporation At the end of the day when you read a book you need to be able to use your knowledge to achieve a task The business table of contents You will find a novelty in this book which is its business table of contents There are two tables of contents in this book There is the classical one to find what you need on database concepts However there is also a business table of contents you can consult to find the business solution you need For example how to conditionally update product prices from multiple suppliers and by various percentages Use this book as a handy reference Finally this book has been written with the idea of using it as a reference You might need to flip its pages to check something simple like the correct use of quotes in criteria expressions or concatenated fields Or you might need to check something more elaborate like how to use a subquery to manipulate data in one table based on the values of another table
