1. The head contains the "brain" and the sensory organs.
2. The "viscera" contains the internal organs.
3. The "tail" is the muscular part of the body.

The class Cephalopoda, meaning "head-footed," includes squids, octopoda, cuttlefish and nautilus. The feet (arms) of these creatures are connected to their heads, not their bodies. The rest of the body is in front of the head. That's why they are called "head-footed."

The most obvious difference between most cephalopods and other mollusks is the apparent lack of a shell. Octopuses do not have shells at all, while squids have a small internal shell. (Nautilus, which are found in the South Pacific and Indian oceans, are the only cephalopods with an external shell. They are also the only cephalopods with four gills instead of two.)
