Newly developed V6 4-stroke engine

The F225 is a newly developed 60-degree V6 4-stroke engine with a very compact and lightweight design. Its size and weight are almost the same as the V6 2-stroke engines that are in current use. This F225 offers numerous advantages of a 4-stroke engine. Compared to conventional 2-stroke models, it emits much cleaner exhaust gases, offers a better fuel economy, and realizes lower noise levels at idle and full throttle.

Through the newly developed "in-bank exhaust system," which discharges exhaust gases from the center of both banks, the engine block and the surrounding equipment have been made compact. In addition, the six independent intake passages help to achieve a high level of driveability and power output.
