Winter Of The World By Ken Follett Dutton October 7 :

Ken Follett and the Triumph of Suspense Carlos Ramet, 2014-11-26 Ken Follett wrote his first international bestseller *Eye of the Needle* when he was 25 years old. He has since been one of the most consistent international best-selling authors with approximately 130 million copies of his books sold worldwide. His manifold influences on the thriller genre include the pioneering use of strong female characters in espionage stories and the development of the historical thriller as a new form of novel exemplified by *Winter of the World* 2012. This book is an investigation of Follett's development as an author and of the craft of writing and the negotiation of serious versus popular literary value from his earliest short stories and screenplays through his mature thrillers and entertainment fiction. Unpublished materials are also considered including his notes, business and personal correspondence, unpublished drafts, journal entries, and outlines. Follett's dramatic shift to writing historical fiction may be his most enduring legacy.

Ken Follett Mary Ellen Snodgrass, 2025-05-13 This book surveys the stellar writing by the Welsh master Ken Follett. The 76 A to Z topics analyze 35 published works and highlight the intangibles: parenting, achievers, literacy, alongside historical themes of plague, healing, religion, and spies. Stylistic touches appear in entries on secondary characters, villains, sense impressions, names, humor, and language. Details authenticate the role of fictional households in global and racial movements. Key to the author's appeal: the progress of women toward full citizenship fuels admirable domestic and career progress by his heroines.

The Neuro-Consumer Anne-Sophie Bayle-Tourtoulou, Michel Badoc, 2020-04-24 Neuroscientific research shows that the great majority of purchase decisions are irrational and driven by subconscious mechanisms in our brains. This is hugely disruptive to the rational logical arguments of traditional communication and marketing practices, and we are just starting to understand how organizations must adapt their strategies. This book explains the subconscious behavior of the neuro consumer and shows how major international companies are using these findings to cast light on their own consumers' behavior. Written in plain English for business and management readers with no scientific background, it focuses on how to adapt marketing and communication to the subconscious and irrational behaviors of consumers: the direct influence of the primary senses (sight, hearing, smell, taste, touch) on purchasing decisions and the perception of communications by customers' brains; implications for innovation, packaging, price, retail environments, and advertising; the use of nudges and artifices to increase marketing and communication efficiency by making them neuro-compatible with the brain's subconscious expectations; the influence of social media and communities on consumers' decisions when collective conscience is gradually replacing individual conscience and recommendation becomes more important than communication; and the ethical limits and considerations that organizations must heed when following these principles. Authored by two globally recognized leaders in business and neuroscience, this book is an essential companion to marketers and brand strategists interested in neuroscience and vital reading for any advanced student or researcher in this area.
