Wireless and Mobile Networking Jozef Wozniak, Jerzy Konorski, Ryszard Katulski, Andrzej R. Pach, 2009-08-31 Recent spectacular achievements in wireless mobile and sensor networks have dramatically changed our lives in many ways. However the rapid evolution of wireless systems not only promises increased functionality reliability availability and security as well as putting a wide variety of new services at the users disposal it also creates a number of design challenges that our research community is now facing. Scientists and engineers need to come up with and promptly implement novel wireless network architectures while system operators and planners rethink their business models and attend to the growing expectations of their customer base. To provide a suitable forum for discussion between researchers practitioners and industry representatives interested in new developments in the respective research area IFIP WG 6.8 launched three separate series of conferences MWCN Mobile and Wireless Communications Networks PWC Personal Wireless Communications and WSAAN Wireless Sensor and Actors Networks. In 2008 MWCN and PWC were merged into the IFIP Wireless and Mobile Networking Conference WMNC 2008 held in Toulouse France from September 30 to October 2 2008. MWNC 2008 and PWC 2008 topics were subsequently revised with a view to covering the whole spectrum of hot issues in wireless and mobile networking. As a result IFIP WG 6.8 decided to add WSAAN as another WMNC track.
