Dear Ms. Carmela Horton,

I hope this letter finds you in the best of health and spirits.

Our mission has been unwavering for years. Jackson,2017-07-05 The mention of sport mega events conjures up images and memories of London 2012 or anticipation of FIFA 2014 the 2016 Rio Olympics and beyond Indeed the expanding annual calendar of sport mega events both in terms of the bidding process and the actual hosting of the event means that there is rarely time for considered reflection This is particularly true within the context of neo liberalism and an obsession with creating world class sporting cities that are propelled by state private promotional discourses that often silence oppositional voices This edited collection focuses on Rugby World Cup 2011 in order to examine the contested terrain of one particular sport mega event with respect to its economic political and cultural impact both locally and globally As an event the 2011 Rugby World Cup was unique in many ways but perhaps the most notable are the nations remote geographic location and at just over four million people its small population This anthology addresses how the Rugby World Cup has changed since its inception in 1987 including a major shift in the globalisation of the game professionalization player migration and television and sponsorship rights The core of the anthology explores how the event impacted on various segments of New Zealand society from the state to regions and individual citizens Collectively the implications are relevant for all who are interested in sport mega events whether it is from a political economic scholarly or policy perspective This book was published as a special issue of Sport and Society **Sport in the City** Michael P. Sam,John Hughson,2013-09-13 Sport is seen as an increasingly important aspect of urban and regional planning Related programmes have moved to the forefront of agendas for cities of the present and future This has occurred as the barriers between so called high and popular culture continue to disintegrate Sport is now a key component within strategies for the cultural regeneration of cities and regions a tendency with mixed outcomes at times fostering genuinely democratic arrangements at others pseudo democratic arrangements whereby political business and cultural elites manipulate a sense of sameness and unity among their fellow citizens to smooth the path for the pursuit of what are actually

vested interests Almost any active enactment of a sports city of culture risks divisiveness Recognizing controversies with both potentially positive and negative outcomes this book examines sport within contexts of urban and regional regeneration via a number of rather different case studies Within these studies the role of sport stadium development franchise expansion and sports fan and anti sport activism is addressed and articulated with issues concerning inter alia public funding environmental impact urban infrastructure and citizen identity The sport in the city project commenced as a research symposium held at the University of Otago Dunedin New Zealand and number of the essays originate from this occasion This book was previously published as a special issue of Sport in Society
