

Prequery - Conditionally suppress subreport

The screenshot displays the Business Objects report designer interface. On the left, a tree view shows the report structure, including sections like Report Header, Page Header, Group Header #1: Customer, Details, Group Footer #1, and Report Footer. The 'Group Footer #1' section is expanded, showing 'Group Footer #1a: Cust' and 'Group Footer #1b: Cust'. Under 'Group Footer #1a: Cust', there is a 'Suppress (No Drill-D)' icon and a 'Subreport1: <Order' subreport. The 'Subreport1' is currently highlighted with a yellow background. On the right, the 'Report Fields' pane shows the data source 'Xtreme SQL (ODBC (RDO))' and the field 'Customer'. Below this, the SQL expression editor contains the following code:

```
IF (Orders Exist?) = 'N'
```

A cursor is visible at the end of the line in the SQL editor.

year and a half researching what NET programmers need to successfully create implement and deploy a Crystal Reports application I even put the book on the internet for everyone to read for free all of last year This generated an incredible number of emails from programmers telling me what they liked disliked and what was missing from the book I learned that there are two distinct types of NET programmers using Crystal Reports The first type of programmer doesn't have much experience with Crystal Reports and wants a series of tutorials to help them build reports from scratch For this programmer I wrote 13 chapters which teach you everything about adding reports to ASP NET and Windows applications It starts with the basics of building reports to adding charts crosstab reports sorting and grouping subreports and using the formula editor with Basic syntax and Crystal syntax The second type of programmer has been using Crystal Reports for years and is mostly concerned with how to do technical runtime customization of reports For this programmer I researched and diagrammed the undocumented report object models I included dozens of examples in both VB NET and C to show you how to modify reports manipulate different data sources XML ADO NET ODBC OLE DB stored procedures with parameters modify formulas and report parameters and integrate NET with the RAS and RDC The dozens of emails I received when the book was online were instrumental for doing a major revision of many chapters before publishing the book in hardcopy format Since releasing the book I continue to receive more emails from people They regret that the free book isn't online anymore but understand that it couldn't last forever and that the hardcopy version is even better I hope you like it and that it helps you achieve your reporting goals

September 2004 Update Due to high demand I did a second printing of the book I took advantage of this opportunity to go through the book and remove all grammatical errors The content is the same but the typos have been corrected
