

Competency Assessment Tasks

The RBT competency assessment evaluates **20 items** across four domains, measurement, assessment, skill acquisition & behavior reduction, and professionalism & requirements.

Measurement: Tasks 1-3

Task 1. Continuous measurement

Record data using continuous measurement.

Continuous measurement: Measuring every occurrence of a particular behavior. Includes duration (how long the behavior lasted), count (how many times the behavior occurred), rate (how many times the behavior occurred across a specified period of time), response latency (the amount of time from the SD to the behavior), and interresponse time (the time from the end of one response to the start of the next). You will need to demonstrate an understanding of **what** continuous measurement is and **how** to measure behaviors using continuous measurements.

Examples:

Count-Screaming occurred 3 times

Duration-Screaming and crying lasted for 2 minutes

Rate-Screaming occurred 4x per hour

Response latency-You tell your client to wash their hands. They don't immediately begin washing their hands. Instead, they finish what they're playing with. Three minutes later, they wash their hands. The response latency is 3 minutes.

Interresponse time-Your client engages in self-injurious behavior (SIB). They hit their head at 8:35 AM, then again at 8:40 and 8:45. The interresponse time between occurrences of this behavior is 5 minutes.

Task 2. Discontinuous measurement

Record data using discontinuous measurement.

Discontinuous measurement: Measuring specified occurrences of behavior, but not all occurrences.

- Partial interval recording: recording intervals that the individual engaged in the target behavior, regardless of how many times or how long the behavior occurred.
- Whole interval recording: recording intervals that the individual engaged in the target behavior for the full interval.
- Momentary time sampling (recording if the target behavior is occurring at the end of an interval)

You will need to demonstrate an understanding of what discontinuous measurement is and how to measure behaviors using discontinuous measures.
