Convention Boot and Shoe Workers Union, 1899 Staging Masculinity Carla J. McDonough, 2006-07-19 The men in plays such as Arthur Miller's Death of a Salesman or Sam Shepard's True West are often presented as universal little attention is given to the gender dynamics involved in the characters This work looks at how contemporary playwrights including Miller Shepard Eugene O'Neill David Mamet and August Wilson stage masculinity in their works It becomes apparent that male playwrights return often to the issues of troubled manhood usually masked in other issues such as war business or family The plays indicate both the attractiveness of the model of traditional masculinity and the illusive nature of this image which all too often fractures and fails the characters who pursue it O'Neill's play The Hairy Ape and the character Yank receive much attention *Awkward Intelligence* Katharina A. Zweig, 2022-10-25 An expert offers a guide to where we should use artificial intelligence and where we should not Before we know it artificial intelligence AI will work its way into every corner of our lives making decisions about with and for us Is this a good thing There's a tendency to think that machines can be more objective than humans can make better decisions about job applicants for example or risk assessments In *Awkward Intelligence* AI expert Katharina Zweig offers readers the inside story explaining how many levers computer and data scientists must pull for AI's supposedly objective decision making She presents the good and the bad AI is good at processing vast quantities of data that humans cannot but it's bad at making judgments about people AI is accurate at sifting through billions of websites to offer up the best results for our search queries and it has beaten reigning champions in games of chess and Go But drawing on her own research Zweig shows how inaccurate AI is for example at predicting whether someone with a previous conviction will become a repeat offender It's no better than simple guesswork and yet it's used to determine people's futures Zweig introduces readers to the basics of AI and presents a toolkit for designing AI systems She explains algorithms big data and computer intelligence and how they relate to one another Finally she explores the ethics of AI and how we can shape the

**Moving Parts** Nina Shengold, Eric Lane, 1992-01-01 Moving Parts offers actors the best monologues from great plays, pieces by both well-known and up-and-coming playwrights, including many minority artists that offer a variety of dramatic styles for beginning and experienced actors. Included are more than a hundred monologues from such contemporary voices as Eric Bogosian, Caryl Churchill, Christopher Durang, Maria Irene Fornes, Athol Fugard, Philip Kan Gotanda, V. C. Havel, Lanford Wilson, and George C. Wolfe. Designed for easy browsing, the monologues are indexed by gender, age, and subject to help actors locate appropriate material, and each is introduced with a short description of the plot, setting, and character type. These monologues stand on their own as good theater, while they give actors a well-defined character, a story to tell, and a wide range of behavior and feeling to portray.

The book includes pedestrian-friendly policies and guidelines from a number of European countries and includes case studies from the UK, Germany, Britain, France, Spain, Italy, the Netherlands, Denmark, the US, and Canada, with further examples from ten additional countries. It also contains a unique collection of original photographs, including before and after photos of newly introduced pedestrian-friendly transport policies.
