When Poe invented the analytic detective genre in the 1840s with the three Dupin stories his underlying project was to examine the very nature of self consciousness But the tradition of detective fiction these stories inspired would draw on only the most superficial aspects of his work One hundred years after Poe however Borges would reinterpret the genre with three detective stories of his own and revive Poe s original ambitious intention to analyze the analytic power In The Mystery to a Solution John Irwin brilliantly examines the deeper significance of the genre Poe created and the meaning of Borges s efforts to double its origin Using a methodology that combines history literary history and practical and speculative criticism Irwin

pursues the issues underlying the detective genre into areas as various as the history of mathematics classical mythology the double mirror structure of self consciousness handedness the anthropology of Evans and Frazer the structure of chess automata the mind body problem the etymology of labyrinth and scores of other topics Irwin honors the aesthetic impact of the genre he discusses by mirroring in his study the dynamics of a detective story the uncovering of mysteries the accumulation of evidence the tracing of clues and the final solution that ties it all together
