Utah State Grass Manual:

Field Guide to Grasses of the Mid-Atlantic Sarah Chamberlain, 2018-04-16 Grasses are among the most ubiquitous plants on the planet. They inhabit a wide geographic range and are found in a variety of natural habitats. The small parts of the grass flower and specialized terminology, however, can make identifying grasses a challenging endeavor. Sarah Chamberlain's *Field Guide to Grasses of the Mid-Atlantic* makes identification simpler for everyone, regardless of their previous botanical knowledge. Featuring an easy-to-use dichotomous key, this is a user-friendly guide to more than 300 types of grasses found from the Blue Ridge Mountains and southern plains to the Appalachians and the Allegheny Plateau. Each major entry contains detailed species diagrams as well as common names, habitats, and distribution. The book's opening sections outline the parts of grass flowers and describe stem, leaf, and sheath characteristics. With a wealth of illustrations, instructions on how to use the key, and a glossary of terms, *Field Guide to Grasses of the Mid-Atlantic* is an indispensable reference for naturalists and conservationists, botanists, land management professionals, and students and scholars of mid-Atlantic flora. *Style Manual of the United States Government Printing Office*, United States Government Printing Office, 1934

Shaw and the team at the Texas A&M details of the classification and distribution of Texas grasses, brief species accounts, distributional maps, color photographs, plus black and white drawings of 670 grass species, native, introduced, and ornamental. Scientific keys help identify the grasses to group, genera, and species, and an alphabetized checklist includes information on origin, native or introduced, longevity, annual or perennial, growth season, cool or warm season, endangered status, and occurrence by ecological zone. A glossary, literature citations, and a quick index to genera round out the book. *Guide to Texas Grasses* is a comprehensive treatment of Texas grasses meant to assist students, botanists, ecologists, agronomists, range scientists, naturalists, researchers, extension agents, and others who work with or are interested in these important plants.
