River Flow 2020 Wim Uijttewaalt, Mário J. Franca, Daniel Valero, Victor Chavarrias, Clàudia Ylla Arbós, Ralph Schielen, Alessandra Crosato, 2020-08-27 Rivers form one of the lifelines in our society by providing essential services such as availability of fresh water navigation energy ecosystem services and flood conveyance Because of this essential role mankind has interfered continuously in order to benefit most and at the same time avoid adverse consequences such as flood risk and droughts This has resulted in often highly engineered rivers with a narrow set of functions In the last decades rivers are increasingly considered in a more holistic manner as a system with a multitude of interdependent processes River research and engineering has therefore added to the river fundamentals also themes like

eco-hydraulics consequences of climate change and urbanisation River Flow 2020 contains the contributions presented at the 10th conference on Fluvial Hydraulics River Flow 2020 organised under the auspices of the Committee on Fluvial Hydraulics of the International Association for Hydro Environment Engineering and Research IAHR What should have been a lively physical gathering of researchers students and practitioners was converted into an online event as the COVID 19 pandemic hindered international travelling and large gatherings of people Nevertheless the fluvial hydraulics community showed their interest and to be very much alive with a high number of participations for such event Since its first edition in 2002 in Louvain la Neuve this series of conferences has found a large and loyal audience in the river research and engineering community while being also attractive to the new researchers and young professionals This is highlighted by the large number of contributions applying for the Coleman award for young researchers and also by the number of applications and attendants to the Master Classes which are aimed at young researchers and students River Flow 2020 aims to provide an updated overview of the ongoing research in this wide range of topics and contains five major themes which are focus of research in the fluvial environment river fundamentals the digital river the healthy river extreme events and rivers under pressure Other highlights of River Flow 2020 include the substantial number of interdisciplinary subthemes and sessions of special interest The contributions will therefore be of interest to academics in hydraulics hydrology and environmental engineering as well as practitioners that would like to be updated about the newest findings and hot themes in river research and engineering *Scientific and Technical Aerospace Reports*, 1989 **Applied Reconfigurable Computing.**

Architectures, Tools, and Applications Nikolaos Voros, Michael Huebner, Georgios Keramidas, Diana Goehringer, Christos Antonopoulos, Pedro C. Diniz, 2018-04-25 This book constitutes the proceedings of the 14th International Conference on Applied Reconfigurable Computing ARC 2018 held in Santorini Greece in May 2018 The 29 full papers and 22 short presented in this volume were carefully reviewed and selected from 78 submissions In addition the volume contains 9 contributions from research projects The papers were organized in topical sections named machine learning and neural networks FPGA based design and CGRA optimizations applications and surveys fault tolerance security and communication architectures reconfigurable and adaptive architectures design methods and fast prototyping FPGA based design and applications and special session research projects **Percutaneous Treatment of Left Side Cardiac Valves** Corrado Tamburino, Marco Barbanti, Davide Capodanno, 2018-03-13 After the success of the first two editions this expanded and extensively revised edition provides the interventional cardiologist with detailed state of the art information on key techniques and approaches to percutaneous treatment of left side cardiac valve disease keeping pace with the rapid and dynamic evolution in the discipline Many new techniques and resources are now available including new devices for transcatheter aortic valve implantation and new approaches to transcatheter mitral valve replacement Numerous images will help the reader to understand the steps of each procedure and the characteristics of the different devices available The

potential complications and expected or potential morbidity from each procedure are discussed in depth along with the best ways to manage them Transcatheter aortic valve implantation has revolutionized the field of interventional cardiology Initially envisaged as a palliative technique for inoperable patients it now offers high risk patients a viable alternative to surgery Several techniques are also available of transcatheter mitral valve repair and initial cases of transcatheter mitral valve replacement have also been reported the interest in these techniques is such that further significant technological advances are expected to be seen over the next few years This highly informative easy to read and carefully structured guide provides interventional cardiologists with updated knowledge on the application of transcatheter techniques to cardiac valves
