Sports Discourse Tony Schirato:

Sports Discourse Tony Schirato, 2013-09-12 This book both defines sports discourse and provides an account of the different discourses that are utilized and come into play when the field of sport speaks. It shows how the sports communities have been addressed over time by various speakers across various multimodal genres. Tony Schirato looks first at how discourse can be viewed as a form of work something that produces and naturalizes meanings and habituates the way we see the world. Grounding this exploration is an account of the development of the field of sport as a specific discursive regime one that is both reflected and refracted by the dominant discourses and values of the time. These discourses have become naturalized and shape activities and materialities at local and global levels. The book ends with an examination of how new technologies and the Web are changing sports discourse in some cases radically via online commentary, Twitter and user generated content.

Encompassing the latest trends and developments, this third edition includes a new chapter on discourse and digital media. New topics including English as a lingua franca, linguistic landscapes and translanguaging. Updated examples from a variety of global perspectives and contexts ranging from North America to East Asia. Updated discussion questions throughout. Spoken Discourse Rodney Jones, 2016-07-28 This book provides an overview of current theories of and methods for analysing spoken discourse. It includes discussions of both the more traditional approaches of pragmatics, conversation analysis, interactional sociolinguistics, linguistic anthropology and critical discourse analysis and more recently developed approaches such as multimodal discourse analysis and critical sociolinguistics. Rather than treating these perspectives as mutually exclusive, the book introduces a framework based on principles from mediated discourse analysis in which different approaches to spoken discourse are seen as complementing and informing one another. In this framework, spoken discourse is seen as mediated through a complex collection of technological, semiotic and cultural tools which enable and constrain people's ability to engage in different kinds of social actions, enact different kinds of social identities and form different kinds of social relationships. A major focus of the volume is on the way technological tools like telephones, broadcast media, digital technologies are changing the way people communicate with spoken language. The book is suitable for use as a textbook in advanced courses in discourse analysis and language in social interaction and will also be of interest to scholars in a variety of fields including linguistics, sociology, media studies and anthropology.
