## SPRING BREAK PACKET

### Reading Comprehension

**“spy Technology”**

**The Secret World of Spy Technology**

1. In the shadowy world of spies, some of the coolest gadgets aren't just from movies; they are real tools used by secret missions! Spies have been using amazing technology for years to gather information and stay undercover.

2. Take the spy pen, for example. It looks like any other pen you might use in school, but it has a secret camera inside. Real spies have used pens like this to take photos of important documents, and nobody around them is any wiser!

3. Then there's the tiny device known as a bug. This isn't an insect, but a super small microphone that's almost invisible. Spies place it discreetly in a room, and it can capture every word spoken, even if the spy is somewhere nearby. They can hear everything later, just like they were there!

4. Spies also have special glasses that do more than help them see. These glasses are equipped with a hidden camera. When a spy looks at something important, they can take a photo just by pressing a hidden button! It's like having a memory that never forgets a face or a secret code.

5. And what about their shoes? Would you believe that the soles can hide secret messages? Yes, spies have actually passed notes and tiny films hidden under their shoe soles. It's a clever way to carry information that no one would even think to check.

And part of what makes being a spy sound like any movie like this, these tools are based on real life. They remind us that sometimes, the real world is just as exciting as the stories we imagine. And who knows? Maybe one day you'll find the next great gadget that spies will use to
