IJCACI 2021 is jointly organized by Jahangirnagar University, JU Bangladesh and South Asian University, SAU India. The book presents the novel contributions in areas of computational intelligence and it serves as a reference material for advance research. The topics covered are collective intelligence, soft computing, optimization, cloud computing, machine learning, intelligent software, robotics, data science, data security, big data, analytics, and signal and natural language processing.

Advances in Computer Science, Intelligent Systems and Environment David Jin, Sally Lin, 2011-09-15 CSISE2011 is an integrated conference concentrating its focus upon Computer Science, Intelligent System, and Environment. In the proceeding, you can learn much more knowledge about Computer Science, Intelligent System, and Environment of researchers all around the world. The international conference will provide a forum for engineers, scientists, teachers, and all researchers to discuss their latest research achievements and their future research plan. The main role of the proceeding is to be used as an exchange pillar for researchers who are working in the mentioned field. In order to meet high standard of Springer's Advances in Intelligent and Soft Computing, the organization committee has made their efforts to do the following things: Firstly, poor quality paper has been refused after reviewing course by anonymous referee experts. Secondly, periodically review meetings have been held around the reviewers about five times for exchanging reviewing suggestions. Finally, the conference organization had several preliminary sessions before the conference. Through efforts of different people and departments, the conference will be successful and fruitful. Statistics 1 for OCR Steve Dobbs, Jane Miller, 2000-06-15 This book is part of the Cambridge Advanced Level Mathematics series written specifically for the OCR modular mathematics syllabus. Each book or half book corresponds

exactly to one module Statistics 1 has chapters on data representation probability expectation and variance and the binomial distribution It also introduces correlation and regression Each chapter starts with a short list of learning objectives and mathematical ideas are explained carefully and clearly with many worked examples There are plenty of exercises throughout along with revision exercises and mock exam papers all written by experienced examiners *Statistical Benchmarks for Quantum Transport in Complex Systems* Mattia Walschaers,2018-07-31 This book introduces a variety of statistical tools for characterising and designing the dynamical features of complex quantum systems These tools are applied in the contexts of energy transfer in photosynthesis and boson sampling In dynamical quantum systems complexity typically manifests itself via the interference of a rapidly growing number of paths that connect the initial and final states The book presents the language of graphs and networks providing a useful framework to discuss such scenarios and explore the rich phenomenology of transport phenomena As the complexity increases deterministic approaches rapidly become intractable which leaves statistics as a viable alternative
