Algorithms, Automation, and News Neil Thurman, Seth C. Lewis, Jessica Kunert, 2021-05-17 This book examines the growing importance of algorithms and

automation including emerging forms of artificial intelligence in the gathering composition and distribution of news In it the authors connect a long line of research on journalism and computation with scholarly and professional terrain yet to be explored Taken as a whole these chapters share some of the noble ambitions of the pioneering publications on reporting algorithms such as a desire to see computing help journalists in their watchdog role by holding power to account However they also go further firstly by addressing the fuller range of technologies that computational journalism now consists of from chatbots and recommender systems to artificial intelligence and atomised journalism Secondly they advance the literature by demonstrating the increased variety of uses for these technologies including engaging underserved audiences selling subscriptions and recombining and re using content Thirdly they problematise computational journalism by for example pointing out some of the challenges inherent in applying artificial intelligence to investigative journalism and in trying to preserve public service values Fourthly they offer suggestions for future research and practice including by presenting a framework for developing democratic news recommenders and another that may help us think about computational journalism in a more integrated structured manner The chapters in this book were originally published as a special issue of Digital Journalism
