Unfortunately there is little research consensus on the respective merits of these two approaches or about the best ways to pursue them. Consequently control and prevention policies are mostly driven by political considerations, economic realities and cultural expectations though research has played an important part in formulating and evaluating treatments for drug addiction. This volume reviews studies on drug abuse prevention and treatment strategies under five main areas: 1 Reducing supply strategies to control the flow of drugs from production to retail distribution; 2 Reducing demand prevention of drug use at all stages of involvement and consumption levels; 3 Reducing harm promoting situational risk reduction practices for regular users, addicts and recreational users; 4 Reducing addiction drug treatment options for various groups in various settings; and 5 Drug policies and prescriptions focused on debates about prohibition and legalization. *Federal Register*, 2005-03. *2017 Catalog of Federal Domestic Assistance* United States.
