Stem Cells in Regenerative Medicine Alain A. Vertes, Nasib Qureshi, Arnold I. Caplan, Lee E. Babiss, 2015-12-02 This book is a unique guide to emerging stem cell technologies and the opportunities for their commercialisation. It provides in depth analyses of the science, business, legal and financing fundamentals of stem cell technologies offering a holistic assessment of this emerging and dynamic segment of the field of regenerative medicine. Reviews the very latest advances in the technology and business of stem cells used for therapy, research and diagnostics. Identifies key challenges to the commercialisation of stem cell technology and avenues to overcome problems in the pipeline. Written by an expert team with extensive experience in the business, basic and applied science of stem cell research. This comprehensive volume is essential reading for researchers in cell biology, biotechnology, regenerative medicine and tissue engineering, including scientists and professionals looking to enter commercial biotechnology fields.

The Handbook of Work-based Pension Schemes

Adam Jolly, 2013-01-03 From Autumn 2012 all UK employers will be expected to start offering a pension to any employee who earns more than 5,000. This compulsory measure has far reaching consequences for all players, not only will many new pension customers be brought into the market but companies face strict deadlines and major fines if they do not comply. The Handbook of Work based Pension Schemes takes a practical approach to the many issues and crucial decisions now facing employers. Choose the right course of action and pensions can become a powerful incentive for employees but make a mistake and the consequences can be far reaching and expensive. Published in association with the Institute of Directors, the book is designed to ensure that this new pensions system fulfills its promise to both employers and employees.

Bending the Law of Unintended Consequences

Richard M. Adler, 2020-02-10 This title provides managers, executives and other professionals with an innovative method for critical decision making. The book explains the reasons for decision failures using the Law of Unintended Consequences. This account draws on the work of sociologist Robert K. Merton, psychologists Amos Tversky and Daniel Kahneman, and economist Herbert Simon to identify two primary causes: cognitive biases and bounded rationality. It introduces an innovative method for test driving decisions that addresses both causes by combining scenario planning and what if simulations. This method enables professionals to learn safely from virtual mistakes rather than real ones. It also provides four sample test drives of
