Healthcare Transformation with Informatics and Artificial Intelligence Emmanouil Zoulias, Arie Hasman, Mowafa S. Househ, Martha Charalampidou, Andriana Magdalinou, 2023-07-15 Artificial intelligence AI is once again in the news with many major figures urging caution as developments in the technology accelerate AI impacts all aspects of our lives but perhaps the discipline of Biomedical Informatics is more affected than most and is an area where the possible pitfalls of the technology might have particularly serious consequences This book presents the papers delivered at ICIMTH 2023 the 21st International Conference on Informatics Management and Technology in Healthcare held in Athens Greece from 1-3 July 2023 The ICIMTH conferences form a series of scientific events which offers a platform for scientists working in the field of biomedical and health informatics from all continents to gather and exchange research findings and experience The title of the 2023 conference was Healthcare Transformation with Informatics and Artificial Intelligence reflecting the importance of AI to healthcare informatics A total of 252 submissions were received by the Program Committee of which 149 were accepted as full papers 13 as short communications and 14 as poster papers after review The papers cover a wide range of technologies and topics include imaging sensors biomedical equipment and management and organizational aspects as well as legal and social issues The book provides a timely overview of informatics and technology in healthcare during this time of extremely fast developments and will be of interest to all those working in the field *Smart Ports* Weijian Mi, Yuan Liu, 2022-03-12 This book demonstrates the concept of ecological system of the smart ports The innovation is emphasized as the essence of the ecological system as well as the prerequisite and foundation of sustainable development of smart ports The main supporting technologies of smart ports including cyber physical system middle office system blockchain artificial intelligence machine vision AR VR system simulation and emulation digital monitoring and diagnosis etc are introduced with concepts and development descriptions as well as practical application cases It could be used as demonstration and reference for the administrative staff engineers and technicians as well as researchers in construction and operation of smart ports **The DNA Replication-Repair Interface**, 2021-11-12 Replication Coupled Repair Volume 661 in the Methods in Enzymology series highlights new advances in the field with this new volume presenting interesting chapters on a variety of timely topics including the Repair of replication born DNA breaks by sister chromatid recombination High resolution and high throughput DNA cyclization measurements to interrogate DNA bendability A programmable detection method for genomic signatures from disease diagnosis to genome editing Characterization of the telomerase modulating activities of yeast DNA helicases Eukaryotic DNA replication with purified budding yeast proteins Single molecule studies of yeast Rad51 paralogs Light activation and deactivation of Cas9 for DNA repair studies and more Other chapters explore MIDAS Direct sequencing to map mitotic DNA synthesis and common fragile sites at high precision Studying the DNA damage response in embryonic systems GLASS ChIP to map Mre11 cleavage sites in the human genome New chemical biology approaches to trap

reaction intermediates in living cells Single molecule imaging approaches for monitoring replication fork conflicts at genomic DNA G4 structures and R loops in human cells Monitoring the replication of structured DNA through heritable epigenetic change Visualizing replication fork encounters with DNA interstrand crosslinks and much more Provides the authority and expertise of leading contributors from an international board of authors Presents the latest release in Methods in Enzymology series Includes the latest information on replication coupled repair *The Use Case and Smart Grid Architecture Model Approach* Marion Gottschalk, Mathias Uslar, Christina Delfs, 2017-01-10 This book introduces readers to the fundamentals of the IEC 62559 Use Case Methodology explains how it is related to the Smart Grid Architecture Model SGAM and details how a holistic view for both architecture and requirements engineering can be achieved It describes a standardized and holistic approach to requirements engineering for smart grid projects based on work conducted in the context of the EU M 490 standardization mandate Over the last years this method has been established in Europe as the basic building block of requirements engineering in the utilities sector The authors present a canonical structured approach that users can apply to the Use Case Methodology and the SGAM as well as open tools for this purpose The application in various domains outside the smart grid is also discussed as it can be used for critical infrastructures or system of systems domains like Industrie 4.0 and Ambient Assisted Living Accordingly the book also presents various architecture models for different fields of application like EMAM SCIAM RAMI 4.0 and MAF Scientific Information Bulletin, 1992 Smart Structures Franklin Y. Cheng, Hongping Jiang, Kangyu Lou, 2008-02-25 An innovative concept smart structural systems have proven to be extremely effective in absorbing damaging energy and or counteracting potentially devastating force thus limiting structural collapse and subsequent injury As this technology rapidly evolves there is an ever increasing need for an authoritative reference that will allow those in t **Ctenophores** Leonid L. Moroz, 2024-04-26 This volume explores emerging approaches and methods inspired by recent research using ctenophores or placozoans facilitating the study of these enigmatic species and ancient animal lineages Practical protocols are integrated with introductory chapters about general biology summarizing the diversity evolution genomics development and neurobiology of these organisms Special chapters outline strategies and applications for culturing microscopy physiology electrical synapses and bioluminescence molecular and single cell biology transcription factors as well as gene and protein expression analyses The book also contains bioinformatics and computational chapters covering peptidomics and epigenomics Written for the highly successful Methods in Molecular Biology series chapters include detailed implementation advice that leads to dependable results in the laboratory Authoritative and practical Ctenophores Methods and Protocols is an ideal resource for comparative and experimental biologists and interdisciplinary scientists aiming to decipher fundamental principles of animal organization origin and the evolution of biological complexity in general opening novel avenues for future synthetic biology research **Apomixis** Tatyana Radoeva, Peter J. van Dijk, 2025-10-30 This volume explores the latest research techniques and reviews used to study

apomixis model species The chapters in this book are organized into six parts Part One introduces gametophytic apomixis and Part Two focuses on the detection and characterization of apomixis Part Three talks about transcriptomic profiling of apomictic and sexual species and Part Four covers genetic analysis of apomixis Part Five is dedicated to research on model apomictic systems such as dandelion *Taraxacum* *Pilosella* *Boechera* and *Cenchrus Pennisetum* and the final Part Six looks at protocols for engineering either individual components of apomixis such as apomeiosis or a complete synthetic apomixis system Written in the highly successful Methods in Molecular Biology series format chapters include introductions to their respective topics lists of the necessary materials and reagents step by step readily reproducible laboratory protocols and tips on troubleshooting and avoiding known pitfalls Cutting edge and comprehensive Apomixis Methods and Protocols is a valuable reference for studying apomixis and serves as an inspiration and foundation for designing new approaches and achieving significant breakthroughs in the field Chapter 17 is available Open Access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com)

Signal and Information Processing, Networking and Computers

Songlin Sun,Tao Hong,Peng Yu,Jiaqi Zou,2022-10-12 This book collects selected papers from the 9th Conference on Signal and Information Processing Networking and Computers held online in December 2021 The book focuses on the current works of information theory communication system computer science aerospace technologies big data and other related technologies Readers from both academia and industry of this field can contribute and find their interests from the book

Predictive Maintenance in Dynamic Systems Edwin Lughofer,Moamar Sayed-Mouchaweh,2019-02-28 This book provides a complete picture of several decision support tools for predictive maintenance These include embedding early anomaly fault detection diagnosis and reasoning remaining useful life prediction fault prognostics quality prediction and self reaction as well as optimization control and self healing techniques It shows recent applications of these techniques within various types of industrial production utilities equipment plants smart devices etc systems addressing several challenges in Industry 4.0 and different tasks dealing with Big Data Streams Internet of Things specific infrastructures and tools high system dynamics and non stationary environments Applications discussed include production and manufacturing systems renewable energy production and management maritime systems power plants and turbines conditioning systems compressor valves induction motors flight simulators railway infrastructures mobile robots cyber security and Internet of Things The contributors go beyond state of the art by placing a specific focus on dynamic systems where it is of utmost importance to update system and maintenance models on the fly to maintain their predictive power

Intelligent Control and Smart Energy

Management Maude Josée Blondin,João Pedro Fernandes Trovão,Hicham Chaoui,Panos M. Pardalos,2022-05-28 This volume aims to provide a state of the art and the latest advancements in the field of intelligent control and smart energy management Techniques combined with technological advances have enabled the deployment of new operating systems in many engineering applications especially in the domain of transport and renewable resources The control and energy

management of transportation and renewable resources are shifting towards autonomous reasoning learning planning and operating As a result these techniques also referred to as autonomous control and energy management will become practically ubiquitous soon The discussions include methods based on neural control and others as well as distributed and intelligent optimization While the theoretical concepts are detailed and explained the techniques presented are tailored to transport and renewable resources applications such as smart grids and automated vehicles The reader will grasp the most important theoretical concepts as well as to fathom the challenges and needs related to timely practical applications Additional content includes research perspectives and future direction as well as insight into the devising of techniques that will meet tomorrow s scientific needs This contributed volume is for researchers graduate students engineers and practitioners in the domains of control energy and transportation

Mitochondrial Bioenergetics Carlos M. Palmeira, Paulo J. Oliveira, 2024-11-15 This updated volume provides a concise set of protocols on the conceptual principles and practical considerations pertinent to research in mitochondrial function Driven by the impact of drug and environmental chemical induced disturbances on mitochondrial function hereditary deficiencies and the age related decline in bioenergetic performance this book explores the latest approaches developed in this field by presenting practical principles and assays for quantitative assessments of various parameters reflecting aspects of mitochondrial bioenergetics Written for the highly successful Methods in Molecular Biology series chapters include introductions to their respective topics lists of the necessary materials and reagents step by step and readily reproducible laboratory protocols and tips on troubleshooting and avoiding known pitfalls Authoritative and up to date Mitochondrial Bioenergetics Methods and Protocols Third Edition serves as an ideal guide for scientists endeavoring to enhance the quality of mitochondrial research
