Niedermeyer,2019-08-20 Tesla is the most exciting car company in a generation but can it live up to the hype Tesla Motors and CEO Elon Musk have become household names shaking up the staid auto industry by creating a set of innovative electric vehicles that have wowed the marketplace and defied conventional wisdom The company's market valuation now rivals that of long established automakers and to many industry observers Tesla is defining the future of the industry But behind the hype Tesla has some serious deficiencies that raise questions about its sky high valuation and even its ultimate survival Tesla's commitment to innovation has led it to reject the careful zero defects approach of other car manufacturers even as it struggles to mass produce cars reliably and with minimal defects While most car manufacturers struggle with the razor thin margins of mid priced sedans Tesla's strategy requires that the Model 3 finally bring it to profitability even as the high priced Roadster and Model S both lost money And Tesla's approach of continually focusing on the future even as commitments and deadlines are repeatedly missed may ultimately test the patience of all but its most devoted fans In Ludicrous journalist and auto industry analyst Edward Niedermeyer lays bare the disconnect between the popular perception of Tesla and the day to day realities of the company and the cars it produces Blending original reporting and never before published insider accounts with savvy industry analysis Niedermeyer tells the story of Tesla as it's never been told before with clear eyes objectivity and insight *Automotive News*,2008

Jeremy Clarkson, 2014-09-25 What Could Possibly Go Wrong is the sixth book in Jeremy Clarkson's bestselling The World According to Clarkson series. No one writes about cars like Jeremy Clarkson. While most correspondents are too busy diving straight into BHP, MPG and MPH, Jeremy appreciates that there are more important things to life. Don't worry, we'll get to the cars eventually. But first, we should consider the case for invading France. The overwhelming appeal of a nice sit-down. The inconvenience of gin and tonic. Why clothes are no better than ice cream. Spot welding with the Duchess of Kent. And why Denmark is the best place in the world. Armed only with conviction, curiosity, enthusiasm and a stout pair of trousers, Jeremy hurtles around the world along motorway, autoroute, freeway and autobahn in search of answers to life's puzzles and ponderings without forethought or fear for his own safety. What you have to ask could possibly go wrong. Praise for Clarkson: Brilliant laugh-out-loud. Daily Telegraph. Outrageously funny. Will have you in stitches. Time Out. Very funny. I cracked up laughing on the tube. Evening Standard. Jeremy Clarkson began his career on the Rotherham Advertiser. Since then he has written for the Sun, the Sunday Times, the Rochdale Observer, the Wolverhampton Express Star, all of the Associated Kent Newspapers and Lincolnshire Life. Today he is the tallest person working in British television. **Lemon-Aid New Cars and Trucks 2012**

Phil Edmonston, 2011-12-03 Phil Edmonston: Canada's automotive Dr. Phil pulls no punches. He says there's never been a better time to buy a new car or truck thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases and free auto maintenance programs. In this all-new guide, he says Audis are beautiful to behold but hell to own, biodegradable transmissions, rodent snack wiring and mind-boggling depreciation. Many 2011-12 automobiles have chin-to-chest head restraints, blinding dash reflections and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway. Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers. GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that killed its own electric car more than a decade ago. You can save 2,000 by cutting freight fees and administrative charges. Diesel annual urea fill-ups cost you 300, including an 80 handling charge for 25 worth of urea. Lemon Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi and Suzuki. **E-Mobility in Electrical Energy Systems for Sustainability**
