Security-Enriched Urban Computing and Smart Grid Ruay-Shiung Chang, Tai-Hoon Kim, Sheng-Lung Peng, 2011-10-29

This book constitutes the proceedings of the Second International Conference on Security Enriched Urban Computing and Smart Grid held in Hualien Taiwan in September 2011. The 35 revised full papers presented together with two invited papers were carefully reviewed and selected from 97 submissions. Among the topics covered are the internet of things, mobile networks, wireless networks, service oriented computing, data centric computing, voice over IP, cloud computing, privacy, smart grid systems, distributed systems, agent based systems, assistive technology, social networks, and wearable computing.

Strategies for Smart Car Buyers The Editors at Edmunds.com, Phillip Reed, 2003-10-15. In the Internet age, Edmunds.com has emerged as the foremost authority on buying or leasing new or used cars. A key component to learning the industry's insider secrets involved sending an Edmunds.com editor to work undercover at multiple car dealerships. That information, along with knowledge gleaned from countless buying experiences and numerous dealership sources, has been honed into step by step buying and leasing strategies. Many car buying books give tips and advice, but this book outlines proven buying scenarios, clearly explaining the consumer's course of action in simple terms. This complex and sometimes frightening process is demystified in a guide that covers the following subjects: How car buying has become easier and faster than ever before; How to choose the right car for you; New car buying strategies; Getting a used car bargain; Avoid leasing pitfalls and getting a good deal; Insuring your car for less money.

Advances in Manufacturing Processes and Smart Manufacturing Systems

Denni Kurniawan, Fethma M. Nor, 2024-12-27. This book presents an exploration of contemporary challenges and opportunities in manufacturing and supply chain management, expected to provide insights for academics and industry professionals. This is the first volume of a two-volume proceedings series curated from over 100 submissions from the Global Congress on Manufacturing and Management (GCM) 2023 held in Kuching, Malaysia, on December 4-7, 2023. The chapters cover a broad spectrum of industries, including automotive, electronics, food, and energy, with a wide range of topics from the adoption of new technologies like induction stoves and electric vehicles to the optimization of production facilities and supply chain resilience.

Smart Energy for Smart Transport Eftihia G. Nathanail, Nikolaos Gavanis, Giannis Adamos, 2023-03-10. This book reports on original research and practical findings fostering sustainable and smart urban mobility transformation. Gathering contributions presented at the 6th Conference on Sustainable Urban Mobility held from August 31 to September 2, 2022, on Skiathos Island, Greece, it covers topics relating to electric and clean energy, intelligent technologies, and automation, green travel modes, and transport safety. It highlights solutions for inclusive transportation, sustainable and resilient supply chains, and describes novel strategies for urban planning and innovative transport infrastructure. This book offers extensive information to academicians, researchers, practitioners, and decision makers working on effective strategies to transform urban mobility in a sustainable and equitable way.

Big Data Analytics for Connected Vehicles and Smart Cities Bob McQueen, 2017-08-31 This practical new book presents the application of big data analytics to connected vehicles, smart cities, and transportation systems. This book enables transportation professionals to understand how data analytics can and will expand the design and engineering of connected vehicles and smart cities. Readers find extensive case studies and examples that provide a strong framework focusing on practical application of data sciences and analytic tools for actual projects in the field. Both federal and private sector investments have a strong interest in the connected vehicle, and this book discusses the impact this has on transportation. This book defines urban analytics and modeling incentives and governance, mobility networks, energy networks, and other attributes and elements that craft a smart city. Readers learn how smart cities impact the application of advanced technologies in urban areas. This book explains how recently passed transportation legislation for the US has a specific emphasis on the use of data for performance management.

The Governance of Smart Transportation Systems Matthias Finger, Maxime Audouin, 2018-08-22 This book presents essential new governance structures to embrace and regulate smart mobility modes. Drawing on a range of case studies, it paves the way for new approaches to governing future transportation systems. Over the past decades, Information and Communication Technologies have enabled the development of new mobility solutions that have completely redefined traditional and well-established urban transportation systems. Urban transportation systems are evolving dramatically from the development of shared mobility modes to the advent of electric mobility and from the automated mobility trend to the rapid spread of integrated transportation schemes. Given the disruptive nature of those new mobility solutions, new governance structures are needed. Through a series of case studies from around the world, this book highlights governance and regulatory processes having supported or sometimes prevented the development and implementation of smart mobility solutions: shared, automated, electric, integrated. The combination of chapters offers a comprehensive overview of the different research endeavours focusing on the governance of smart transportation systems and will help pave the way for this important subject, which is crucial for the future of cities.
