As a result, teachers often are provided with professional learning activities that lack focus and coherence. The Focus Model solves this growing problem with a method for carefully implementing research-informed initiatives, proven to work, and getting the most out of them. Detailing, from standards to learning intentions, defining with clarity the skills your students most need now, criteria for success, defining with clarity what it will mean for students to have mastered skills, critical formative analysis of students, taking formative assessment to a systemic level of implementation, impact professional learning communities, PLCs, collaborating with colleagues so that the focus is learning for both students and the adults, with the Focus Model, your school and system will benefit from the truth that less is more in planning for improvement. Here's a first synthesis of today's best suggestions about how we can make school improvement a reality instead of a hope. A seasoned perceptive author has assembled an excellent collection of school improvement tactics that are demonstrable winners. W. James Popham, Emeritus Professor, UCLA. If the US
