Smart Growth Manual Duany:

The Smart Growth Manual Andres Duany, Jeff Speck, Mike Lydon, 2004-01-22 Everyone is calling for smart growth but what exactly is it In *The Smart Growth Manual* two leading city planners provide a thorough answer From the expanse of the metropolis to the detail of the window box they address the pressing challenges of urban development with easy to follow advice and broad array of best practices With their landmark book *Suburban Nation* Andres Duany and Jeff Speck set forth more clearly than anyone has done in our time the elements of good town planning *The New Yorker* With this long awaited companion volume the authors have organized the latest contributions of new urbanism green design and healthy communities into a comprehensive handbook fully illustrated with the built work of the nation's leading practitioners *The Smart Growth Manual* is an indispensable guide to city planning This kind of progressive development is the only way to fully restore our economic strength and create new jobs new industries and a renewed ability to compete in the first rank of world economies Gavin Newsom Mayor of San Francisco Authors Andres Duany Jeff Speck and Mike Lydon have created *The Smart Growth Manual* a resource which not only explains the overarching ideals of smart growth but a manual that takes the time to show smart growth principles at each geographic scale region neighborhood street building I highly recommend it as a part of any community participant's or urban planner's desktop references LocalPlan.org Planetizen Top 10 Books 2010 On the ninth annual list of the ten best books in urban planning design and development The goal of *The Smart Growth Manual* is clear from page 1 to create a guidebook for smart growth following the pattern of the Charter for New Urbanism Duany Speck and Lydon have achieved that in spades the Charter is included in the appendix in case we missed the connection It even clears up some of the architectural arguments that attach themselves to New Urbanists such as this segment of Section 14.1 Regional Design While new buildings should not be compelled to mimic their historic predecessors designers should pay attention to local practices regarding materials and colors roof pitches eave lengths window to wall ratios and the socially significant relationship of buildings to their site and the street these have usually evolved in intelligent response to local conditions In addition to making the old traditional vs modern argument irrelevant Duany Speck and Lydon have truly managed to boil down the best parts of current practices into a highly readable portable book

Place-making and Urban Development

Pier Carlo Palermo, Davide Ponzini, 2014-12-05 The regeneration of critical urban areas through the redesign of public space with the intense involvement of local communities seems to be the central focus of place making according to some widespread practices in academic and professional circles Recently new expertise maintains that place making could be an innovative and potentially autonomous field competing with more traditional disciplines like urban planning urban design architecture and others This book affirms that the question of making better places for people should be understood in a broader sense as a symptom of the non contingent limitations of the urban and spatial disciplines It maintains that research should not be oriented only towards new technical or merely formal solutions but rather towards the profound rethinking of disciplinary paradigms In the fields of urban planning urban design and policy making the challenge of place making provides scholars and practitioners a great opportunity for a much needed critical review Only the substantial reappraisal of long standing technical cultural institutional and social premises and perspectives can truly improve place making practices The pressing need for place making implies trespassing undue disciplinary boundaries and experimenting a place based approach that can innovate and integrate planning regulations strategic spatial visioning and urban development projects Moreover the place making challenge compels urban experts and policy makers to critically reflect upon the physical and social contexts of their interventions In this sense facing place making today is a way to renew the civic and social role of urban planning and urban design
