INTRODUCTION

The STANDARD MEDICAL OPERATING GUIDELINES SMOG continues to go through significant improvements with each release as a result of the collaboration of Emergency Medicine professionals, experienced Flight Medics, Aeromedical Physician Assistants, Critical Care Nurses, and Flight Surgeons. There has been close coordination in the development of these guidelines by the Joint Trauma System and the Defense Committees on Trauma. Our shared goal is to ensure the highest quality en route care possible and to standardize care across all evacuation and emergency medical pre hospital units. It is our vision that all of these enhancements and improvements will advance en route care across the services and the Department of Defense. Unit medical trainers and medical directors should evaluate Critical Care Flight Paramedics' CCFP ability to follow and execute the medical instructions herein. These medical guidelines are intended to guide CCFPs and prehospital professionals in the response and management of emergencies and the care and treatment of patients in both garrison and combat theater environments. Unit medical providers are not expected to employ these guidelines blindly. Unit medical providers are expected to manipulate and adjust these guidelines to their unit's mission and medical air crew training experience. Medical directors or designated supervising physicians should endorse these guidelines as a baseline, appropriately adjust components as needed, and responsibly manage individual unit medical missions within the scope of practice of their Critical Care Flight Paramedics. Enroute Critical Care Nurses and advanced practice aeromedical providers. The medication section of
