**Prompt:** Discuss an accomplishment or event, formal or informal, that marked your transition from childhood to adulthood within your culture, community, or family.

When I take a look at a picture of my younger self, I always comment on how I have changed and grown, not just physically, but also emotionally and mentally as an individual. About a month after the recent photo I was looking at was taken, I entered AA College without any knowledge as to what I should expect. I was a young lady who was several thousand miles away from home.

Surrounding me is a complete picture of things that are different from what I used to know. However, I see my priorities really well. I love studying different kinds of planes and cars. If there is one special occurrence that can happen to a person is the diversity of our student body, which proves us a big help for us new students there. I am not really sure whether or not the speed up of my maturing process is good for me or not, but I know that I have benefitted well.

The classroom environment has become an entirely different world for me. Before, the students and teachers were preaching the importance of knowledge and learning. It was also obvious that students were concerned of the grades. However, I believe that effort should come from us, the students.

I particularly liked one teacher who always assigned us to prepare everyday in order to discuss a book. What makes it unique is that she made the requirements clear we should be able to maximize the sources we have, but not allowed to look at the book. We can ask from other people in the school. Because of that teaching strategy, I learned the importance of 'thinking'. I believe this is very important as I continue with my education further.

**Continental Philosophy and the Palestinian Question** Zahi Zalloua, 2017-02-23 From Sartre to Levinas continental philosophers have looked to the example of the Jew as the paradigmatic object of and model for ethical inquiry Levinas for example powerfully dedicates his 1974 book *Otherwise than Being* to the victims of the Holocaust and turns attention to the state of philosophy after Auschwitz Such an ethics radically challenges prior notions of autonomy and comprehension two key ideas for traditional ethical theory and more generally the Greek tradition It seeks to respect the opacity of the other and avoid the dangers of hermeneutic violence But how does such an ethics of the other translate into real everyday life What is at stake in thinking the other as Jew Is the alterity of the Jew simply a counter to Greek universalism Is a rhetoric of exceptionalism with its unavoidable ontological residue at odds with shifting political realities Within this paradigm what then becomes of the Arab or Muslim the other of the Jew the other of the other so to speak This line of ethical thought in its desire to bear witness to past suffering and come to terms with subjectivity after Auschwitz arguably brackets from analysis present operations of power Would then a more sensitive historical approach expose the Palestinian as the other of the Israeli Here Zahi Zalloua offers a challenging intervention into how we configure the contemporary

**Guatemala, the Question of Genocide** Elizabeth A. Oglesby, Diane M. Nelson, 2018-12-07 In Guatemala it was called the trial of the century the 2013 prosecution of former de facto head of state 1982-1983 General Jos Efra n R os Montt and his intelligence chief General Jos Mauricio Rodr guez S nchez on charges of genocide and crimes against humanity against the Maya Ixil people R os Montt's seventeen month reign was one of the bloodiest periods in Guatemala's history with scorched earth massacres the destruction of hundreds of Maya communities and militarized resettlement of Mayas into model villages R os Montt was convicted on all charges Ten days later a higher court vacated the verdict on dubious procedural grounds Nevertheless Guatemala's genocide trial held in the domestic courts in the country where the crimes were committed was precedent setting In this volume Guatemalan and international scholars rigorously explore the

complexities of the Guatemala experience and reflect upon the case's implications for understanding and prosecuting the category of genocide more broadly. Topics include the nexus of racism and counterinsurgency in explaining Guatemala's genocide, the politics of Maya collective memory, the intersections of gender, sexuality and ethnicity in genocide, the decades-long interconnections of national and transnational justice processes that brought the case to trial, and the limits and contributions of tribunal justice. This book was originally published as a special issue of the Journal of Genocide Research.

**Elsewhere in America** David Trend, 2016-04-28 Americans think of their country as a welcoming place where everyone has equal opportunity. Yet historical baggage and anxious times can restrain these possibilities. Newcomers often find that civic belonging comes with strings attached, riddled with limitations or legally punitive rites of passage. For those already here, new challenges to civic belonging emerge on the basis of belief, behavior or heritage. This book uses the term *elsewhere* in describing conditions that exile so many citizens to some other place through prejudice, competition or discordant belief. Yet in another way, *elsewhere* evokes an undefined, not yet ripe with potential. In the face of America's daunting challenges, can *elsewhere* point to optimism, hope and common purpose? Through 12 detailed chapters, the book applies critical theory in the humanities and social sciences to examine recurring crises of social inclusion in the U.S. After two centuries of incremental progress in securing human dignity, today the U.S. finds itself torn by new conflicts over reproductive rights, immigration, health care, religious extremism, sexual orientation, mental illness and fear of terrorists. Is there a way of explaining this recurring tendency of Americans to turn against each other? *Elsewhere in America* engages these questions, charting the ever-changing faces of difference manifest in contested landscapes of sex and race, to such areas as disability and mental health, their spectral and intersectional character, recent discourses on performativity, normativity and queer theory, and the grounds on which categories are manifest in ideation and movement, politics, metapolitics, cosmopolitanism, dismodernism.

**Iconic Ideas in the History of Social Thought** Wsevolod W. Isajiw, 2016-05-13 The book distinguishes a number of types of social thought and traces their history from tribal times until present day. It shows that human beings thought systematically about their societies very early in their development, even if only informally, as they did not write treatises about them. In many ways, they formed a basis for all social thought that followed. The book discusses the social thought of ancient civilizations and talks about how the rationalism of Greek and Roman times and the religiosity of early and later Christianity influenced its development. The book then explains the influence of the Reformation, the change of the intellectual climate and the emergence of new approaches to the discussion about the nature of society. It talks about the theorists who argued that societies were created by social contract among people, and some like the colorful Robert Owen advised that we should learn by doing. He tried to establish two colonies in which people would work and live together and share the products of their work among all in the colony. This was a benign socialist idea. It did not work. But soon the aggressive socialism of Karl Marx and his followers emerged. A strong trend emerged in the meantime for the scientific study

of society employing all the methods of the natural sciences Sociology as a professional discipline thus developed An issue emerged whether society is just a congregation of individuals or has a reality of its own Differences among scholars emerged with American sociologists favoring individualistic sociology and Europeans favoring the reality of society approach But the contest was crowned by Max Weber whom some consider to be the greatest sociologist who ever lived and his analytical and *verstehende* sociology The field of sociology has spread out widely into various specializations The book also studies popular social thought It briefly describes Islamic social thought looks at popular thought in Europe in the first half of the 20th century and current American popular thought It ends by discussing the future of social thought Jewish Literatures in Spanish and Portuguese Ruth Fine,Susanne Zepp,2022-10-24 This volume offers a thorough introduction to Jewish world literatures in Spanish and Portuguese which not only addresses the coexistence of cultures but also the functions of a literary and linguistic space of negotiation in this context From the Middle Ages to present day the compendium explores the main Jewish chapters within Spanish and Portuguese language world literature whether from Europe Latin America or other parts of the world No comprehensive survey of this area has been undertaken so far Yet only a broad focus of this kind can show how diasporic Jewish literatures have been and are while closely tied to their own traditions deeply intertwined with local and global literary developments and how the aesthetic praxis they introduced played a decisive formative role in the history of literature With this epistemic claim the volume aims at steering clear of isolationist approaches to Jewish literatures

**The Routledge Handbook of Propositions** Chris Tillman,Adam Murray,2022-09-30 Propositions are routinely invoked by philosophers linguists logicians and other theorists engaged in the study of meaning communication and the mind To investigate the nature of propositions is to investigate the very nature of our connection to each other and to the world around us As one of the only volumes of its kind The Routledge Handbook of Propositions provides a comprehensive overview of the philosophy of propositions from both historical and contemporary perspectives Comprising 33 original chapters by an international team of scholars the volume addresses both traditional and emerging questions concerning the nature of propositions and our capacity to engage with them in thought and in communication The chapters are clearly organized into the following three sections I Foundational Issues in the Theory of Propositions II Historical Theories of Propositions III Contemporary Theories of Propositions Essential reading for philosophers of language and mind and for those working in neighboring areas The Routledge Handbook of Propositions is suitable for upper level undergraduate study as well as graduate and professional research *Towards an embodied science of intersubjectivity: Widening the scope of social understanding research* Ezequiel Di Paolo,Hanne De Jaegher,2015-06-16 An important amount of research effort in psychology and neuroscience over the past decades has focused on the problem of social cognition This problem is understood as how we figure out other minds relying only on indirect manifestations of other people s intentional states which are assumed to be hidden private and internal Research on this question has mostly investigated how individual

cognitive mechanisms achieve this task A shift in the internalist assumptions regarding intentional states has expanded the research focus with hypotheses that explore the role of interactive phenomena and interpersonal histories and their implications for understanding individual cognitive processes This interactive expansion of the conceptual and methodological toolkit for investigating social cognition we now propose can be followed by an expansion into wider and deeply related research questions beyond but including that of social cognition narrowly construed Our social lives are populated by different kinds of cognitive and affective phenomena that are related to but not exhausted by the question of how we figure out other minds These phenomena include acting and perceiving together verbal and non verbal engagement experiences of dis connection management of relations in a group joint meaning making intimacy trust conflict negotiation asymmetric relations material mediation of social interaction collective action contextual engagement with socio cultural norms structures and roles etc These phenomena are often characterized by a strong participation by the cognitive agent in contrast with the spectatorial stance typical of social cognition research We use the broader notion of embodied intersubjectivity to refer to this wider set of phenomena This Research Topic aims to investigate relations between these different issues to help lay strong foundations for a science of intersubjectivity the social mind writ large To contribute to this goal we encouraged contributions in psychology neuroscience psychopathology philosophy and cognitive science that address this wider scope of intersubjectivity by extending the range of explanatory factors from purely individual to interactive from observational to participatory

International Cooperation in the Early Twentieth Century Daniel Gorman, 2017-09-21 The early 20th century world experienced a growth in international cooperation Yet the dominant historical view of the period has long been one of national military and social divisions rather than connections International Cooperation in the Early Twentieth Century revises this historical consensus by providing a more focused and detailed analysis of the many ways in which people interacted with each other across borders in the early decades of the 20th century It devotes particular attention to private and non governmental actors Daniel Gorman focuses on international cooperation international social movements various forms of cultural internationalism imperial and anti imperial internationalism and the growth of cosmopolitan ideas The book incorporates a non Western focus alongside the transatlantic core of early 20th century internationalism It interweaves analyses of international anti colonial networks ideas emanating from non Western sites of influence such as Japan China and Turkey the emergence of networks of international indigenous peoples in resistance to a state centric international system and diaspora and transnational ethno cultural religious identity networks

Suburban Space, the Novel and Australian Modernity Brigid Rooney, 2018-11-15 Suburban Space the Novel and Australian Modernity investigates the interaction between suburbs and suburbia in a century long series of Australian novels It puts the often trenchantly anti suburban rhetoric of fiction in dialogue with its evocative and imaginative rendering of suburban place and time Suburban Space the Novel and Australian Modernity rethinks existing cultural debates about

suburbia in Australia and elsewhere by putting novelistic representations of suburbs suburban interiors homes streets forms and lives over time in dialogue with the often negative idea of suburbia in fiction as an amnesic and conformist cultural wasteland Suburban space the novel and Australian modernity shows in other words how Australian novels dramatize the collision between the sensory terrain of the remembered suburb and the cultural critique of suburbia It is through such contradictions that novels create resonant mental maps of place and time Australian novels are a prism through which suburbs as sites of everyday colonization defined by successive waves of urban development are able to be glimpsed sidelong
