, **Proceedings of the International Congress of Mathematicians** J. A. Todd, 2013-09-12 This volume contains the official record of the Congress of Mathematicians held in Edinburgh from 14 to 21 August 1958 **Proceedings of the International Congress of Mathematics 14-21 August 1958**, *All Positive Action Starts with Criticism* Sacha la Bastide-van Gemert, 2015-01-16 This study provides a historical analysis of Freudenthal's didactic ideas and his didactic career. It is partly biographical but also contributes to the historiography of mathematics education and addresses closely related questions such as what is mathematics and where does it start. Which role does mathematics play in society and what influence does it have on the prevailing views concerning its accompanying didactics. Hans Freudenthal 1905-1990 professor in mathematics, scientist, literator, but above all mathematics educator, was inextricably linked to the changes which took place in mathematics education and didactics during the second half of the last century. His diversity as a scientist and his inexhaustible efforts to establish the didactics of mathematics as a seriously pursued science made Freudenthal's influence in this area considerable. He foresaw an essential practical role for mathematics in everyone's life, encouraging students to discover and create mathematics themselves instead of imposing a ready-made mathematical system. The theory of mathematics education thus developed in the Netherlands would gain world fame in the following decades. Today, in the light of the discussions about mathematics education in which the call for genuine mathematics instead of the so-called kindergarten mathematics can be heard, Freudenthal's approach seems to be passed. However, the outcome of this study, which is mainly based on documents from Freudenthal's vast personal archive, shows a more refined picture. The direct identification of kindergarten mathematics with Freudenthal's view on mathematics education is not justified. Realistic mathematics as advocated by Freudenthal includes more than just a practical introductory and should, among other things, always aim at teaching genuine mathematics in the end. *Zeitschrift für Angewandte Mathematik und Mechanik. Todd, 1960 *Die Fakultät für Mathematik und Geoinformation/The Faculty of Mathematics and Geoinformation* Michael Drmota, Josef Jansa, Reinhard Winkler, 2016-07-11 The Faculty of Mathematics and Geoinformation of the TU Wien has existed as such since the division of the early very large Faculty of Technical Sciences in 2004. It provides its own study programmes in both subjects as well as ensuring the mathematical and geometrical basic education of the students of all seven other faculties. The faculty also conducts research in broad and highly crucial focal areas. The current volume is part of a comprehensive commemorative series published in 2015 for the bicentennial memorial of the TU Wien, providing information on the research activities, teaching tasks, and history of the Faculty of Mathematics and Geoinformation in particular over the last 50 years. Special attention has been paid to the exceptional scientific achievements of faculty members. **Proceedings**, 1913
