Books can inform, entertain, inspire, irritate, liberate or challenge readers and their forms can be tangible and traditional like a printed casebound volume or virtual and transitory like a screen page of a cell phone novel. Written in clear, non-specialist prose, *The Book in Society* first provides an overview of the rise of the book and of the modern publishing and bookselling industries. It explores the evolution of written texts from early forms to contemporary formats, the interrelationship between literacy and technology and the prospects for the book in the twenty-first century. The second half of the book is based on historian Robert Darnton's concept of a book publishing communication circuit. It examines how books migrate from the minds of authors to the minds of readers, exploring such topics as the rise of the modern notion of the author, the role of states and others in promoting or restricting the circulation of books, various modes of reproducing and circulating texts and how readers' responses help shape the form and content of the books available to them. Feature boxes highlighting key texts, individuals and developments in the history of the book, carefully selected illustrations and a glossary all help bring the history of the book to life.
