**McTaggart's Paradox** R.D. Ingthorsson, 2016-06-10 McTaggart's argument for the unreality of time first published in 1908 set the agenda for 20th century philosophy of time. Yet there is very little agreement on what it actually says; nobody agrees with the conclusion but still everybody finds something important in it. This book presents the first critical overview of the last century of debate on what is popularly called McTaggart's Paradox. Scholars have long assumed that McTaggart's argument stands alone and does not rely on any contentious ontological principles. The author demonstrates that these assumptions are incorrect. McTaggart himself explicitly claimed his argument to be dependent on the ontological principles that form the basis of his idealist metaphysics. The result is that scholars have proceeded to understand the argument on the basis of their own metaphysical assumptions, duly arriving at very different interpretations. This book offers an alternative reading of McTaggart's argument and at the same time explains why other commentators arrive at their mutually incompatible interpretations. It will be of interest to students and scholars with an interest in the philosophy of time and other areas of contemporary metaphysics.

**Towards Non-Being** Graham Priest, 2016-09-22 *Towards Non-Being* presents an account of the semantics of intentional language verbs such as *believes*, *fears*, *seeks*, *imagines*. Graham Priest tackles problems concerning intentional states which are often brushed under the carpet in discussions of intentionality such as their failure to be closed under deducibility. Priest's account draws on the work of the late Richard Routley, Sylvan and proceeds in terms of objects that may be either existent or non-existent at worlds that may be either possible or impossible. Since Russell, non-existent objects have had a bad press in Western philosophy. Priest mounts a full-scale defence. In the process, he offers an account of both fictional and mathematical objects as non-existent. The book will be of central interest to anyone who is concerned with intentionality in the philosophy of mind or philosophy of language, the metaphysics of existence and identity, the philosophy of fiction, the philosophy of mathematics or cognitive representation in AI. This updated second edition adds ten new chapters to the original eight. These further develop the ideas of the first edition, reply to critics and explore new areas of relevance. New topics covered include conceivability, realism, antirealism concerning non-existent objects, self-deception and the verb *to be*.

**Present Imperfect** Andrew van der Vlies, 2017-05-26 **Present Imperfect** asks how South African writers have responded to the end of apartheid to the hopes that attended the birth of the new nation in 1994 and to the inevitable disappointments that have followed The first full length study of affect in

South Africa's literature understands disappointment both as a description of bad feeling and as naming a missed appointment with all that was promised by the anti colonial and anti apartheid Struggle a disappointment. Attending to contemporary writers' treatment of temporality, genre and form, it considers a range of negative feelings that are also experiences of temporal disjuncture including stasis, impasse, boredom, disaffection and nostalgia. *Present Imperfect* offers close readings of work by a range of writers, some known to international Anglophone readers including J. M. Coetzee, Nadine Gordimer, Ivan Vladislavic and Zo Wicomb, some slightly less well known including Afrikaans language novelists Marlene van Niekerk and Ingrid Winterbach and others from a new generation including Songeziwe Mahlangu and Masande Ntshanga. It addresses key questions in South African studies about the evolving character of the historical period in which the country now finds itself. It is also alert to wider critical and theoretical conversations looking outward to make a case for the place of South African writing in global conversations and mobilizing readings of writing marked in various ways as South African in order to complicate the contours of World Literature as category, discipline and pedagogy. It is thus also a book about the discontents of neoliberalism, the political energies of reading and the fates of literature in our troubled present.

*Physics of the Human Temporality* Ihor Lubashevsky, Natalie Plavinska, 2021-10-21. This book presents a novel account of the human temporal dimension called the human temporality and develops a special mathematical formalism for describing such an object as the human mind. One of the characteristic features of the human mind is its temporal extent. For objects of physical reality only the present exists which may be conceived as a point-like moment in time. In the human temporality the past, retained in the memory, the imaginary future and the present coexist and are closely intertwined and impact one another. This book focuses on one of the fragments of the human temporality called the complex present. A detailed analysis of the classical and modern concepts has enabled the authors to put forward the idea of the multi-component structure of the present. For the concept of the complex present the authors proposed a novel account that involves a qualitative description and a special mathematical formalism. This formalism takes into account human goal-oriented behavior and uncertainty in human perception. The present book can be interesting for theoreticians, physicists dealing with modeling systems where the human factor plays a crucial role, philosophers who are interested in applying philosophical concepts to constructing mathematical models and psychologists whose research is related to modeling mental processes.

**A Critical Appraisal of Karl Olivecrona's Legal Philosophy** Torben Spaak, 2014-06-17. This book offers a critical appraisal of Karl Olivecrona's legal philosophy. Based on Olivecrona's critique of the view that law has binding force, the analysis of the concept and function of a legal rule and the idea that law is a matter of organized force, the book argues that Olivecrona's legal philosophy is a unique contribution to twentieth-century legal philosophy. It shows how Olivecrona's philosophy can be used in the assessment of contemporary theories of law such as those put forward by Hart, Raz, Dworkin and Alexy. In addition, the book argues that Olivecrona's various discussions of theories defended by key people in the history of legal and political philosophy are highly
