Starlight Express Lodestar Autoguider:

The Astrophotography Manual Chris Woodhouse, 2015-05-01 The Astrophotography Manual is for those photographers who aspire to move beyond using standard SLR cameras and editing software and who are ready to create beautiful images of nebulae, galaxies, clusters and the solar system. Beginning with a brief astronomy primer, this book takes readers through the full astrophotography process from choosing and using equipment through image capture, calibration and processing. This combination of technical background information and the hands-on approach brings the science down to earth with a practical method to plan for success. Features include: Over 400 images, graphs and tables to illustrate these concepts. A wide range of hardware to be used including smartphones, tablets and the latest mount technologies. How to utilize a variety of leading software such as Maxim DL, Nebulosity, Sequence Generator Pro, Photoshop and PixInsight. Case studies showing how and when to use certain tools and overcoming technical challenges. How sensor performance and light pollution relate to image quality and exposure planning.

Astro-Imaging Projects for Amateur Astronomers Jim Chung, 2015-07-09 This is the must-have guide for all amateur astronomers who double as makers, doers, tinkerers, problem solvers and inventors. In a world where an amateur astronomy habit can easily run into the many thousands of dollars, it is still possible for practitioners to get high quality results and equipment on a budget by utilizing DIY techniques. Surprisingly, it's not that hard to modify existing equipment to get new and improved usability from older or outdated technology, creating an end result that can outshine the pricey, higher-end tools. All it takes is some elbow grease, a creative and open mind and the help of Chung's hard-won knowledge on building and modifying telescopes and cameras. With this book, it is possible for readers to improve their craft, making their equipment more user-friendly. The tools are at hand and the advice on how to do it is here. Readers will discover a comprehensive presentation of astronomical projects that any amateur on any budget can replicate, projects that utilize leading-edge technology and techniques sure to invigorate the experts and elevate the less experienced. As the maker community continues to expand, it has wonderful things to offer amateur astronomers with a willingness to get their hands dirty. Tweaking observing and imaging equipment so that it serves a custom purpose can take your observing options to the next level while being fun to boot.

Imaging the Southern Sky Stephen Chadwick, Ian Cooper, 2012-12-12 This book is not about imaging from the southern hemisphere but rather about imaging those areas of the sky that lie south of the celestial equator. Many of the astronomical objects presented are also accessible to northern hemisphere imagers, including those in both the USA and Europe. Imaging the Southern Sky discusses over 150 of the best southern objects to image, including nebulae, galaxies and planetaries, each one accompanied by a spectacular color image. This book also includes sections on both image capturing and processing techniques and so makes an ideal all-in-one introduction. Furthermore, because it contains an in-depth study of how to capture all the objects, many of which are rarely imaged by amateurs and professionals alike, it is also extremely useful for the more advanced imager.

Astronomy Now, 2008 **Capturing the**

The book's focus ranges from how to image sweeping vistas and star trails using only a camera body, lens, and tripod to more advanced methods suitable for imaging galaxies, clusters, nebulae, and stars. Other features of the book include Real world assignments showing how and when to use certain tools and how to overcome challenges and setbacks. Practical construction projects. Evaluations of the most recent developments in affordable hardware and software. Exploration on how sensor performance and light pollution relate to image quality and exposure planning.
