Student Self-Assessment as a Process for Learning Zi Yan,2022-08-08 Covering both higher education and school education this book contributes to the field of assessment by providing a systematic account of student self assessment based on a consistent conceptualisation Yan advocates viewing self assessment as an active and reflective process and using it as a learning strategy rather than an assessment method He builds on a newly developed self assessment model adopting a process perspective and synthesises a series of interrelated empirical investigations into the whole chain of student self assessment research The research encompassed in the volume spans from self assessment practices and measurement through predictors of self assessment its interweaved relationship with self regulated learning and feedback literacy impact on student learning outcomes to designing sustainable self assessment interventions The empirical evidence is from a wide

range of current scholarship to ensure that the principles and implications conveyed are applicable internationally
Policymakers students and scholars in educational assessment educational psychology and teaching and instruction will find
the theoretical explorations and empirical investigations contained within useful to show how student self assessment could
be better conceptualised researched and practised Introductory Econometrics Hamid Seddighi,2013-03-01 This book
constitutes the first serious attempt to explain the basics of econometrics and its applications in the clearest and simplest
manner possible Recognising the fact that a good level of mathematics is no longer a necessary prerequisite for economics
financial economics undergraduate and postgraduate programmes it introduces this key subdivision of economics to an
audience who might otherwise have been deterred by its complex nature **Using Econometrics** A. H.
