Va Fileman User Manual:

VA FileMan User Manual United States. Department of Veterans Affairs. Decentralized Hospital Computer Program, 1992

VA FileMan, 1986 *Computerizing Large Integrated Health Networks* Robert M. Kolodner, 2012-12-06 This book has been a long time in the making The computerization activities described in these pages began in 1977 at the Department of Veterans Affairs VA but we devoted most of our focus and efforts to building and then implementing the extensive hospital information system known as the Decentralized Hospital Computer System DHCP throughout VA Delivering the product has been our primary goal We spent relatively little time documenting or describing our experiences or lessons learned Except for some presentations at national meetings and a relatively few publications almost none of which were in the standard trade journals read by Chief Information Officers CIOs and equivalent top managers in the private and nonprofit sectors VA's accomplishments remained a well kept secret In 1988 Helly Orthner encouraged VA staff to consider writing a book but the press of day to day activities always seemed to take precedence and the book languished on the back burner

Encyclopedia of Microcomputers Allen Kent, James G. Williams, 2024-11-01 The Encyclopedia of Microcomputers serves as the ideal companion reference to the popular Encyclopedia of Computer Science and Technology Now in its 10th year of publication this timely reference work details the broad spectrum of microcomputer technology including microcomputer history explains and illustrates the use of microcomputers throughout academe business government and society in general and assesses the future impact of this rapidly changing technology **Metadata-driven Software**

Systems in Biomedicine Prakash M. Nadkarni, 2011-05-27 While the use of database technology is ubiquitous throughout IT and health IT in particular it is not generally appreciated that as a database increases in scope certain designs are far superior to others In biomedical domains new knowledge is being generated continually and the databases that must support areas such as clinical care and research must also be able to evolve while requiring minimal or no logical physical redesign Appropriately designed metadata and software designed to utilize it effectively can provide significant insulation against change Many of the larger EMR or clinical research database vendors have realized this but their designs are proprietary and not described in the literature Consequently numerous misconceptions abound among individuals who have not had to work with large scale biomedical systems and graduates of a health or bioinformatics program may find that they need to unlearn what they were taught in database and software design classes in order to work productively with such systems A working knowledge of such systems is also important for individuals who are not primarily software developers such as health informaticians medical information officers and data analysts This book is in a sense intended to prepare all of the above individuals for the real world *Managing Healthcare Information Systems with Web-Enabled Technologies* Eder, Lauren B., 1999-07-01 Healthcare organizations are undergoing major reorganizations and adjustments to meet the increasing demands of improved healthcare access and quality as well as lowered costs As the use of information technology

to process medical data increases much of the critical information necessary to meet these challenges is being stored in digital format Web enabled information technologies can provide the means for greater access and more effective integration of healthcare information from disparate computer applications and other information resources Managing Healthcare Information Systems with Web Enabled Technologies presents studies from leading researchers and practitioners focusing on the current challenges directions trends and opportunities associated with healthcare organizations and their strategic use of Web enabled technologies **Medical Informatics Europe 85** F.H. Roger,P. Grönroos,R. Tervo-Pellikka,R.

O'Moore,2012-12-06 The European Federation for Medical Informatics EFMI is a regional coordinating body for the National Informatics Societies of Europe EFMI has organized a number of congresses The Congresses in Cambridge 1978 Berlin 1979 Toulouse 1981 Dublin 1982 and Brussels 1984 were all successful in providing the wide variety of people in the caring and specialists in the computing profession with up to date information from the expanding multidisciplinary field of medical informatics We hope that the sixth European Congress on Medical Informatics MIE 85 in Helsinki will be equally successful You have in your hand the pre publication of papers to be presented at MIE 85 as well as the short abstracts of the posters The proceedings enable the participants to follow work presented at sessions that they are unable to attend It also provides a permanent record with relevant bibliography for workers in the field of medical computing All the papers have been refereed and the referees suggestions incorporated in the final text Rapid publication using camera ready paper reduces the time required for editing and indexing The editorial board has worked hard to improve the standard of the communications and to reduce the number of errors Very few papers did not arrive in time to be included in the proceedings these are marked with in the table of contents **Decentralized Hospital Computer Program** ,1993 *Veterans' Administration's*

Decentralized Hospital Computer Program United States. Congress. House. Committee on Veterans' Affairs. Subcommittee on Hospitals and Health Care,1987 **Nursing System Users Manual, Version 1.1** ,1986 *Texas Medicine* ,1988

Effectiveness of VA Pharmacy Drug Controls and VA Prescription Form Controls United States. Congress. House. Committee on Veterans' Affairs. Subcommittee on Oversight and Investigations,1992 Proceedings Randolph Miller,1990

Information Systems Plan ,1988 *IRM Program* United States. Department of Veterans Affairs. Office of Finance and Information Resources Management,1992 **IRM Program** United States. Department of Veterans Affairs. Office of Information Resources Management,1991 **Implementing Health Care Information Systems** Helmuth F.

Orthner,Bruce I. Blum,2012-12-06 This series in Computers and Medicine had its origins when I met Jerry Stone of Springer Verlag at a SCAMC meeting in 1982 We determined that there was a need for good collections of papers that would help disseminate the results of research and application in this field I had already decided to do what is now Information Systems for Patient Care and Jerry contributed the idea of making it part of a series In 1984 the first book was published and thanks to Jerry's efforts Computers and Medicine was underway Since that time there have been many changes Sadly Jerry died at a

very early age and cannot share in the success of the series that he helped found On the bright side however many of the early goals of the series have been met As the result of equipment improvements and the consequent lowering of costs computers are being used in a growing number of medical applications and the health care community is very computer literate Thus the focus of concern has turned from learning about the technology to understanding how that technology can be exploited in a medical environment

Veterans Affairs Valerie C. Melvin, 2008-12 The Dept of Veterans Affairs VA through its Veterans Health Admin VHA provides health care for more than 5 million veterans each year In 2001 VHA began an initiative HealtheVet to modernize its current medical information system The objectives of this report were to determine the status of the modernization VA s overall plan for completing it and how VA is providing oversight to ensure the success of the initiative Includes recommendations Charts and tables

Informatics in Pathology ,1986 Medical Informatics 20/20 Douglas Goldstein, 2007 Despite pressure from the private sector to market their own custom solutions the healthcare industry is coming around to the idea of applying the strategies of collaboration open solutions and innovation to meet the ever changing demands for healthcare information to support quality and safety This book provides a roadmap for improving quality of care using Electronic Health Records EHR and interoperable consumer centric health information solutions Through a series of case studies the authors highlight collaborative and innovative initiatives that are already being used around the world such as the acclaimed VistA system from Veterans Health and a variety of other open source EHR systems
