Cross-Lingual Word Embeddings Anders Søgaard,Ivan Vulić,Sebastian Ruder,Manaal Faruqui,2022-05-31 The majority of natural language processing NLP is English language processing and while there is good language technology support for standard varieties of English support for Albanian Burmese or Cebuano and most other languages remains limited Being able to bridge this digital divide is important for scientific and democratic reasons but also represents an enormous growth potential A key challenge for this to happen is learning to align basic meaning bearing units of different languages In this book the authors survey and discuss recent and historical work on supervised and unsupervised learning of such alignments Specifically the book focuses on so called cross lingual word embeddings The survey is intended to be systematic using consistent notation and putting the available methods on comparable form making it easy to compare wildly different approaches In so doing the authors establish previously unreported relations between these methods and are able to present a fast growing literature in a very compact way Furthermore the authors discuss how best to evaluate cross lingual word embedding methods and survey the resources available for students and researchers interested in this topic

The UN Convention on the Elimination of All Forms of Discrimination Against Women and its Optional Protocol Patricia Schulz,Ruth Halperin-Kaddari,Beate Rudolf,Marsha A. Freeman,2022-12-01 This volume is the fully revised and updated version of the first comprehensive commentary on the Convention on the Elimination of All Forms of Discrimination against Women and its Optional Protocol It reflects the developments during the decade following the publication of the first edition in 2012 which has also seen a notable rise in individual complaints more than 85 ten new General Recommendations and six new inquiry procedures as well as numerous statements partly in conjunction with other UN human rights bodies The Convention is a key international human rights instrument and the only one exclusively addressed to women It has been described as the United Nations landmark treaty in the struggle for women s rights At a time when the backlash against women s human rights and the concept of gender based discrimination is increasingly challenged by governments and powerful societal actors the Commentary is an important instrument to hold all state powers to account on their international obligations under the Convention The Commentary analyses the interpretation of the Convention through the work of its monitoring body the Committee on the Elimination of Discrimination against Women It comprises detailed analyses of the Preamble and each article of the Convention and of the Optional Protocol including a separate chapter on the cross cutting substantive issue of violence against women The sources relied on are the treaty language and the general recommendations concluding observations and case law under the Optional Protocol individual complaints and inquiries through which the Committee has interpreted and applied the Convention Each chapter is self contained but the Commentary is conceived of as an integral whole The book also includes an introduction which provides an overview of the Convention and its embedding in the international law of human rights as well as the most recent challenges

Water Management in Megacities Cecilia Tortajada, Olli Varis, Asit K. Biswas, Jan Lundqvist, 2013-09-13 Efficient and equitable water wastewater and stormwater management for the megacities is becoming an increasingly complex task The special issue will focus on water management in its totality for megacities including their technical social economic legal institutional and environmental dimensions through a series of specially invited case studies from different megacities of the world At present around one out of two of the earth's 6.3 billion people live in urban areas Each year the world population grows by around 80 millions Practically all of this growth is urban primarily due to migration World's urban population is expected to reach 5 billion by 2030 which is nearly 2.3rd more than in 2000 and would mean that 60% of world's population will live in urban areas The case studies analysed include some of the most interesting and challenging megacities of this planet Dhaka Istanbul Jakarta Johannesburg Mexico City Riyadh and S o Paulo They assess different aspects of how water is intermingled in the overall development milieu The special issue will consider the magnitudes nature and extent of the present and future challenges and how these could be met in socially acceptable and cost effective ways The contributors are all acknowledged water experts from different parts of the world This book was previously published as a special issue of the International Journal of Water Resources Development

Labour Law in the Netherlands Antoine T.J.M. Jacobs, 2020-05-21 Derived from the renowned multi volume International Encyclopaedia of Laws this monograph on the Netherlands not only describes and analyses the legal aspects of labour relations but also examines labour relations practices and developing trends It provides a survey of the subject that is both usefully brief and sufficiently detailed to answer most questions likely to arise in any pertinent legal setting Both individual and collective labour relations are covered in ample detail with attention to such underlying and pervasive factors as employment contracts suspension of the contracts dismissal laws and covenant of non competition as well as international private law The author describes all important details of the law governing hours and wages benefits intellectual property implications trade union activity employers associations workers participation collective bargaining industrial disputes and much more Building on a clear overview of labour law and labour relations the book offers practical guidance on which sound preliminary decisions may be based It will find a ready readership among lawyers representing parties with interests in the Netherlands and academics and researchers will appreciate its value in the study of comparative trends in laws affecting labour and labour relations

Lesser Flamingos Lothar Krienitz, 2018-12-31 This book provides insights into the fascinating life of the Lesser Flamingo *Phoeniconaias minor* and describes how this enigmatic bird has

adapted to the extreme conditions of tropical soda lakes and can even withstand the caustic effects of brine. However, humans are increasingly disrupting the natural cycles of these wetlands, and for these pink birds characteristic of these salt lakes, it is becoming more and more difficult to find suitable habitats, food, and breeding grounds. Their fate is considered a cautionary example of man's dealings with nature. Will the Lesser Flamingo survive in a man-made world? Flamingos are considered to be an embodiment of the Phoenix, and the author interweaves his personal experiences with and observations of the flamingos' unusual habitats with the Phoenix motif in order to stimulate reflection on the circle of life. Written in an accessible style that combines science, biological information, and the author's own travels and fieldwork, the book also includes a wealth of captivating images. As such, it offers a unique resource for biologists and nature-loving Africa and Asia enthusiasts alike.

Ecological Informatics Friedrich Recknagel, William K. Michener, 2017-09-21 This book introduces readers to ecological informatics as an emerging discipline that takes into account the data-intensive nature of ecology, the valuable information to be found in ecological data, and the need to communicate results and inform decisions, including those related to research, conservation, and resource management. At its core, ecological informatics combines developments in information technology and ecological theory with applications that facilitate ecological research and the dissemination of results to scientists and the public. Its conceptual framework links ecological entities, genomes, organisms, populations, communities, ecosystems, landscapes, with data management, analysis, and synthesis, and communicates new findings to inform decisions by following the course of a loop. In comparison to the 2nd edition published in 2006, the 3rd edition of *Ecological Informatics* has been completely restructured on the basis of the generic conceptual framework provided in Figure 1. It reflects the significant advances in data management, analysis, and synthesis that have been made over the past 10 years, including new remote and in situ sensing techniques, the emergence of ecological and environmental observatories, novel evolutionary computations for knowledge discovery and forecasting, and new approaches to communicating results and informing decisions. **ECMLG**

2017 13th European Conference on Management, Leadership and Governance Martin Rich, 2017-12-11 These proceedings represent the work of contributors to the 13th European Conference on Management, Leadership, and Governance (ECMLG 2017) hosted this year by the Cass Business School, City University of London, on 11-12 December 2017. The Conference Chair is Dr Martin Rich. The conference will be opened with a keynote address by Dr Helen Rothberg from Marist College, Poughkeepsie, USA, with a speech entitled "Everything I Know about Leadership I Learned as a Bartender." On the second day, the keynote will be delivered by Dr Amanda Goodall from City University of London on the topic of "Why we need core business experts as leaders." ECMLG is a well-established platform for individuals to present their research findings, display their work in progress, and discuss conceptual advances in many different branches of Management, Leadership, and Governance. At the same time, it provides an important opportunity for members of the community to come together with peers, share knowledge, and exchange ideas. With an initial submission of 160 abstracts after the double-blind peer review.

Constructions of Water Quality in South Africa. Suvania Naidoo, 2022-05-04. This book details how the water quality of the Blesbokspruit River in Gauteng, South Africa, was socially constructed by stakeholders and key individuals in the context of acid mine drainage (AMD) and its treatment. Social constructionism is used as the framing for this research to explain how water is intrinsically social. Findings presented here show that stakeholders are aware that the changes in the physicality of the Blesbokspruit resulted from human interventions and varied uses of the water over the years. Such knowledge among factors such as the historical context of mining, current coal mining flows and volumes of water technology used and processes followed, information and communication and vested interests influence social constructions of the water quality. What counts as the truth about water varies depending on the individual's perspective, their purpose and their individual interests. Further, how one defines water quality influences what treatment processes are preferred in order to improve water quality. The book explains why, for example, a treatment process meant to improve water quality gained a bad reputation by the public because of the South African government's silo approach. The book explains how these social constructions are entrenched in power relations between stakeholders regarding AMD treatment and illustrates how power was used to influence decisions to improve the water quality of the Blesbokspruit. The case presented in this book offers insights and recommendations for policymakers working in water governance, including means to influence social constructions of water quality and ways to clarify roles and responsibilities in pursuit of improved cooperative government. **Seismic**

Characterization of Carbonate Platforms and Reservoirs J. Hendry, P. Burgess, D. Hunt, X. Janson, V. Zampetti, 2021-08-17

Modern seismic data have become an essential toolkit for studying carbonate platforms and reservoirs in impressive detail. Whilst driven primarily by oil and gas exploration and development, data sharing and collaboration are delivering fundamental geological knowledge on carbonate systems, revealing platform geomorphologies and how their evolution on millennial time scales as well as kilometric length scales was forced by long-term eustatic oceanographic or tectonic factors.

Quantitative interrogation of modern seismic attributes in carbonate reservoirs permits flow units and barriers arising from depositional and diagenetic processes to be imaged and extrapolated between wells. This volume reviews the variety of carbonate platform and reservoir characteristics that can be interpreted from modern seismic data, illustrating the benefits of creative interaction between geophysical and carbonate geological experts at all stages of a seismic campaign. Papers cover carbonate exploration, including the uniquely challenging South Atlantic pre-salt reservoirs, seismic modelling of carbonates and seismic indicators of fluid flow and diagenesis.
