Doctoral Education in South Africa Cloete, Nico, Mouton, Johann, 2015-12-08 Worldwide in Africa and in South Africa the importance of the doctorate has increased disproportionately in relation to its share of the overall graduate output over the past decade This heightened attention has not only been concerned with the traditional role of the PhD namely the provision of future academics rather it has focused on the increasingly important role that higher education and particularly high level skills is perceived to play in national development and the knowledge economy This book is unique in the area of research into doctoral studies because it draws on a large number of studies conducted by the Centre of Higher Education Trust CHET and the Centre for Research on Evaluation Science and Technology CREST as well as on studies from the rest of Africa and the world In addition to the historical studies new quantitative and qualitative research was undertaken to produce the evidence base for the analyses presented in the book The findings presented in *Doctoral Education in South Africa* pose anew at least six tough policy questions that the country has struggled with since 1994 and continues to struggle with if it wishes to gear up the system to

meet the target of 5 000 new doctorates a year by 2030 Discourses framed around the single imperatives of growth efficiency transformation or quality will not however generate the kind of policy discourses required to resolve these tough policy questions effectively What is needed is a change in approach that accommodates multiple imperatives and allows for these to be addressed simultaneously

Dealing with the Complex Interrelation of Intermittent Supply and Water Losses

Bambos Charalambous, Chrysi Laspidou, 2017-08-15 The book provides a scientific approach into appraising Intermittent Water Supply IWS on a global scale through the analysis of available information and data based on a structured methodology for estimating the population affected by IWS worldwide both by country and by geographical regions The root causes and the implications of IWS are dealt with in a concise manner providing a detailed account of the reasons for resistance to change towards 24x7 supply A major contribution of the book is in providing an understanding of water losses in the context of IWS as well as the related difficulties in leakage detection and metering under such conditions A methodology is presented for transitioning from IWS to continuous supply covering technical social and communication issues which are considered of paramount importance for a successful transition Relevant case studies from across the globe are included in the book to provide evidence based information and data relating to the many and diverse challenges faced daily by water utilities operating their networks under IWS

Nutrition Economics

Suresh Babu, Shailendra Gajanan, J. Arne Hallam, 2016-11-02 Nutrition Economics Principles and Policy Applications establishes the core criteria for consideration as new policies and regulations are developed including application based principles that ensure practical effective implementation of policy From the economic contribution of nutrition on quality of life to the costs of malnutrition on society from both an individual and governmental level this book guides the reader through the factors that can determine the success or failure of a nutrition policy Written by an expert in policy development and incorporating an encompassing view of the factors that impact nutrition from an economic standpoint and their resulting effects this book is unique in its focus on guiding other professionals and those in advanced stages of study to important considerations for correct policy modeling and evaluation As creating policy without a comprehensive understanding of the relevant contributing factors that lead to failure is not an option this book provides a timely reference Connects the direct and indirect impacts of economic policy on nutritional status Provides practical insights into the analysis of nutrition policies and programs that will produce meaningful results Presents a hands on approach on how to apply economic theory to the design of nutritional policies and programs
