Getting Textbooks to Every Child in Sub-Saharan Africa Birger Fredriksen,Sukhdeep Brar,2015-05-22

Textbooks play a key role in enhancing the quality of learning especially in the context of low income Sub Saharan African SSA countries characterized by large class size poorly motivated and inadequately trained teachers and short effective school years There are also high rates of illiteracy among parents and few reading materials at home for the student to bank on Despite extensive investments by governments the World Bank and other development partners the majority of students in primary and secondary schools in SSA still lack the benefit of access to textbooks and the key reason for this shortage is affordability textbooks are generally much more costly in SSA than in other developing regions The need to increase access to key learning resources is of particular urgency because most African countries experience low learning outcomes which in part contributes to a high drop out rate Only two thirds of those who enter school reach the final grade and only about half of these master basic numeracy and literacy skills And although quality improvement depends on many factors inside and outside the school there is wide agreement that availability of textbooks is both an indispensable and a cost effective way of improving the quality of the learning process A recent World Bank study examined the actual costs of textbooks the scope for cost reduction the portion of a national budget countries allocate to teaching and learning materials TLMs and hurdles in the way of making textbooks available to student Some interesting findings from the study The availability of affordable

textbooks to all students could be dramatically improved by devoting an estimated 3 to 4 percent of the primary education budget and 6 to 7 percent of the secondary education budget. The production process methods, copyright length of print runs, effective procurement practices rather than the production costs should be the target of cost saving strategies. The increased integration of ICTs into education in SSA can provide important opportunities for promoting availability of electronic TLMs but electronic TLMs are not a substitute for printed TLMs including textbooks.

Cheap Books and Good Books Brander Matthews, 1888

Where Have All the Textbooks Gone? Tony Read, 2015-07-22 This World Bank report is a rich compilation of information on teaching learning materials (TLM) in Africa based on the extensive and multi-faceted experience of the author's work in the education sector in Africa. The study examines a wide range of issues around TLM provision including curriculum, literacy and numeracy, language of instruction, policy, procurement and distribution challenges, TLM development and production and their availability, management and usage in schools. It also looks at the role of information and communication technology (ICT) based TLMs and their availability. The study recognizes that improved TLM system management is a critical component in achieving affordable and sustainable TLM provision for all students. This study, which draws from more than 40 Anglophone, Francophone, Lusophone and Arabic speaking countries, will be particularly useful for policymakers, development partners and other stakeholders attempting to understand the wide range of issues surrounding the complexity of textbook provision in Sub-Saharan Africa.

Books in the Digital Age John B. Thompson, 2013-10-21 The book publishing industry is going through a period of profound and turbulent change brought about in part by the digital revolution. What is the role of the book in an age preoccupied with computers and the internet? How has the book publishing industry been transformed by the economic and technological upheavals of recent years and how is it likely to change in the future? This is the first major study of the book publishing industry in Britain and the United States for more than two decades. Thompson focuses on academic and higher education publishing and analyses the evolution of these sectors from 1980 to the present. He shows that each sector is characterized by its own distinctive logic or dynamic of change and that by reconstructing this logic we can understand the problems, challenges and opportunities faced by publishing firms today. He also shows that the digital revolution has had and continues to have a profound impact on the book publishing business although the real impact of this revolution has little to do with the ebook scenarios imagined by many commentators. *Books in the Digital Age* will become a standard work on the publishing industry at the beginning of the 21st century. It will be of great interest to students taking courses in the sociology of culture, media and cultural studies and publishing. It will also be of great value to professionals in the publishing industry, educators and policy makers and to anyone interested in books and their future.
