Dear Beneficiary

WISHING YOU A HAPPY XMAS IN ADVANCE.

This is to officially bring to your notice that the New government of UK London have decided to compensate all the scam victims with 3 millions british pound each (THREE MILLIONS BRITISH POUNDS ONLY) You are listed and approved for this payment as one of the scammed victims and to be paid this amount, get back to me as soon as possible for the immediate payments of your 3 MILLION BRITISH POUNDS compensations funds.

On these faithful recommendations, we want you to know that during the last U.N meetings held IN AFRICA, it was alarmed so much by the world in the meetings on the loss of funds by various individuals to the scams artists operating in syndicates all over the world today. In order to compensate scams victims, the Africans Body in conjunction with the U.N Government is now paying a total 150 victims of this operator 3 millions british pounds each in accordance with the U.N.recommendations.

Due to the corrupt and inefficient Banking Systems, your payments are be supervised by the United Nations Officials and the CORIS BANK and Finance International Bank as the corresponding paying office, According to the number of applicants at hand, 114 Beneficiaries have already been paid, half of the victims are from the United States, and India. We still have more 36 victims left to be paid ther (THREE MILLIONS BRITISH POUNDS) compensations funds.

Task Intelligence for Search and Recommendation Chirag Shah, Ryen W. White, 2022-06-01 While great strides have been made in the field of search and recommendation there are still challenges and opportunities to address information access issues that involve solving tasks and accomplishing goals for a wide variety of users Specifically we lack intelligent systems that can detect not only the request an individual is making what but also understand and utilize the intention why and strategies how while providing information and enabling task completion Many scholars in the fields of information retrieval recommender systems productivity especially in task management and time management and artificial intelligence have recognized the importance of extracting and understanding people s tasks and the intentions behind performing those tasks in order to serve them better However we are still struggling to support them in task completion e g in search and assistance and it has been challenging to move beyond single query or single turn interactions The proliferation of intelligent agents has unlocked new modalities for interacting with information but these agents will need to be able to work understanding current and future contexts and assist users at task level This book will focus on task intelligence in the context of search and recommendation Chapter 1 introduces readers to the issues of detecting understanding and using task and task related information in an information episode with or without active searching This is followed by presenting several prominent ideas and frameworks about how tasks are conceptualized and represented in Chapter 2 In Chapter 3 the narrative moves to showing how task type relates to user behaviors and search intentions A task can be explicitly expressed in some cases such as in a to do application but often it is unexpressed Chapter 4 covers these two scenarios with several related works and case studies Chapter 5 shows how task knowledge and task models can contribute to addressing emerging retrieval and recommendation problems Chapter 6 covers evaluation methodologies and metrics for task based systems with relevant case studies to demonstrate their uses Finally the book concludes in Chapter 7 with ideas for future directions in this important research area
