Introductions, Executive Summary, and Methodology

European Physical and Rehabilitation Medicine Bodies Alliance

ABSTRACT

The White Book (WB) of Physical and Rehabilitation Medicine (PRM) in Europe is produced by the 4 European PRM Bodies (European Academy of Rehabilitation Medicine – EARM, European Society of PRM – ESPRM, European Union of Medical Specialists – PRM Section, European College of PRM-ECPRM) served by the European Union of Medical Specialists-PRM Board) and constitutes the reference book for PRM physicians in Europe. It has now reached its third edition; the first was published in 1997 and the second in 2006/2007. The WB has multiple purposes, including providing a unifying framework for European countries, to inform decision-makers on European and national level, to offer educational material for PRM trainees and physicians and information about PRM to the medical community, other rehabilitation professionals and the public.

The WB states the importance of PRM, a primary medical specialty that is present all over Europe, with a specific corpus discipline, a common background and history throughout Europe. PRM is internationally recognized and a partner of major international bodies, including the World Health Organization (WHO). PRM activities are strongly based on the documents of the United Nations (UN) and WHO, such as the Convention of the Rights of Persons with Disabilities (2006), the World Report on Disability (2011), the WHO Global Disability Action Plan 2014-2021 (2014) and the WHO initiative "Rehabilitation 2030: a call for action" (2017).

The WB is organized in 4 sections, 11 chapters and some appendices. The WB starts with basic definitions and concepts of PRM and continues with why rehabilitation is needed by individuals and society. Rehabilitation focuses not only on health conditions but also on functioning. Accordingly, PRM is the medical specialty that strives to improve functioning of people with a health condition or experiencing disability. The fundamentals of PRM, the history of the PRM specialty, and the structure and activities of PRM organizations in Europe are presented, followed by a thorough presentation of the practice of PRM, i.e. knowledge and skills of PRM physicians, the clinical field of competence of PRM, the place of the PRM specialty in the healthcare system and society, education and continuous professional development of PRM physicians, specifications and challenges of science and research in PRM. The WB concludes with the way forward for the specialty: challenges and perspectives for the future of PRM.

Foreword

The first edition of the White Book (WB) of PRM in Europe was written with the ambition of becoming a working instrument that would enable health sector authorities and teachers of medicine to take the necessary regulatory steps towards compulsory inclusion of PRM in medical studies, as well as to achieve effective, optimized harmonization of training of specialists in PRM in Europe.

The second edition of the WB of PRM in Europe aimed to ensure that PRM is seen as a significant European medical specialty, where high quality practitioners ensure good standards of care, practice based on scientific evidence and within their respective national contexts. This is achieved by defining the PRM special-

ty, its work, the competencies of its practitioners and its relationships to other medical disciplines and allied health professions.

Both editions of the White Book of PRM in Europe were well received not only by health professionals but also by policymakers who have widely used the information contained in the White Book for organizing rehabilitation delivery. Ten years after the release of the second edition, the European PRM bodies consider it timely to update the content of the White Book in order to illustrate how the specialty has developed and how recent trends are influencing practice.

The third edition of the White Book of PRM in Europe is produced by the European PRM Bodies Alliance (UEMS PRM Section, European College of PRM served by the UEMS PRM Board, ESPRM and EARM).
