Slone, 2020-11-26 Today's enterprise cannot effectively function without a network and today's enterprise network is almost always based on LAN technology. In a few short years LANs have become an essential element of today's business environment. This time in the spotlight while well deserved has not come without a price. At the same time today's IT managers must deliver business critical information systems in an environment that has undergone radical paradigm shifts in such widely varied fields as computer architecture operating systems application development and security. The Local Area Networks Handbook focuses on this collective environment in which networking and information technology work together to create LAN based enterprise networks.
