The Young Crusaders V. P. Franklin,2021-02-23 An authoritative history of the overlooked youth activists that spearheaded the largest protests of the Civil Rights Movement and set the blueprint for future generations of activists to follow Some of the most iconic images of the Civil Rights Movement are those of young people engaged in social activism such as children and teenagers in 1963 being attacked by police in Birmingham with dogs and water hoses But their contributions have not been well documented or prioritized The Young Crusaders is the first book dedicated to telling the story of the hundreds of thousands of children and teenagers who engaged in sit ins school strikes boycotts marches and demonstrations in which Dr Martin Luther King Jr and other national civil rights leaders played little or no part It was these young activists who joined in the largest civil rights demonstration in US history the system wide school boycott in New York City on February 3 1964 where over 360 000 elementary and secondary school students went on strike and thousands attended freedom schools Later that month tens of thousands of children and teenagers participated in the Freedom Day boycotts in Boston and Chicago also demanding quality integrated education Distinguished historian V P Franklin illustrates how their ingenuity made these and numerous other campaigns across the country successful in bringing about the end to legalized racial discrimination It was these unheralded young people who set the blueprint for today s youth activists and their campaigns to address poverty joblessness educational inequality and racialized violence and discrimination Understanding the role of children and teenagers transforms how we understand the Civil Rights Movement and the broader part young people have played in shepherding social and educational progress and it serves as a model for the youth led reparatory justice campaigns seen today mounted by Black Lives Matter March for Our Lives and the Sunrise Movement

Progress and Values in the Humanities Volney Patrick Gay, 2010 Money and support tend to flow in the direction of economics science and other academic departments that demonstrate measurable progress The humanities on the other hand offer more abstract and uncertain outcomes A humanist s objects of study are more obscure in certain ways than pathogens and cells Consequently it seems as if the humanities never truly progress Is this a fair assessment By comparing objects of science such as the brain the galaxy the amoeba and the quark with objects of humanistic inquiry such as the poem the photograph the belief and the philosophical concept Volney Gay reestablishes a fundamental distinction between science and the humanities He frees the latter from its pursuit of material based progress and restores its disciplines to a place of privilege and respect Using the metaphor of magnification Gay shows that while we can investigate natural objects to the limits of imaging capacity magnifying cultural objects dissolves them into noise In other words cultural objects can be studied only within their contexts and through the prism of metaphor and narrative Gathering examples from literature art film philosophy religion science and psychoanalysis Gay builds a new justification for the humanities By revealing the unseen and making abstract ideas tangible the arts create meaningful wholes which itself is a form of progress
