ADDING LAUNDRY PRODUCTS

IMPORTANT: Do not overfill. Do not overfill detergent or liquid fabric softener. It may also result in component malfunction and, over time, buildup of suds in the tub. Always follow the manufacturer's instructions for the best performance.

ADDING HE DETERGENT TO BASKET

Add a measured amount of detergent or single-dose laundry pods into the basket. If using one type of detergent, add the detergent to the basket before loading the clothes. If using a combination of detergent and pods, add the detergent to the basket before loading the clothes.

NOTE:

Follow the manufacturer's instructions to determine the amount of laundry products to use.

ADDING LIQUID CHLORINE BLEACH

Do not overfill. Add to, or use more than, 1 cup (236 mL) of bleach per cycle with liquid chlorine bleach.

ADDING LIQUID FABRIC SOFTENER

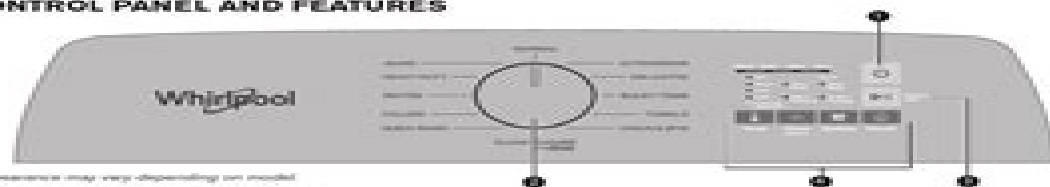

Do not overfill. Add to, or use more than, 1 cup (236 mL) of fabric softener per cycle with liquid fabric softener. Follow the manufacturer's instructions to determine the amount of laundry products to use. Then use the Rinse/Options button to select Fabric Softener. The Rinse/Options button will automatically release the fabric softener at the correct time in the cycle. For more information, see the Rinse/Options button on the control panel. For more information, see the Rinse/Options button on the control panel.

PAUCET

Press to access an infant water stream. Use this feature to prewash clothes and other items right in the washer. You can also use this feature to manually add water to the machine as desired.

NOTE: The washer will drain at the beginning of the cycle if a large amount of water is added to the machine. The machine can instantly sense the load size.

NOTE: If the washer detects an out-of-balance condition it may pause and attempt to correct it. During this time the Start and Wash status indicators will both briefly illuminate.

WARNING: Do not wash water-resistant or water repellant-type clothing. Failure to properly follow these instructions may result in an abnormal operating and out-of-balance condition that could result in physical injury, property damage, and/or appliance damage.

CHOOSING THE RIGHT CYCLE

A cycle guide for your washer can be found online at www.whirlpool.com. This document will help identify which cycle to choose for various load types as well as the default cycle options. For example, we recommend using the NORMAL cycle with Warm water for cottons, linens, and mixed-garment loads.

PRE-TREATING BEFORE A WASH CYCLE

- Press the Paused button once to turn on and press again to turn off.
- Press will automatically shut off after 30 minutes or when the water level is reached.
- Water will automatically drain if water level becomes too high. Water will also drain after 30 minutes if the lid is left closed or 3 hours if the lid is left closed.

MORE WATER WHEN YOU WANT IT

AUTO SENSING AND DEEP WATER

- The washer will adjust the water level to the optimal amount for a High-Efficiency wash of the detected load size.
- Press Deep Water to automatically add more water to your wash cycle.
- It is recommended to use BULKY ITEMS cycle with Deep Water option for loads where maximum water level is desired.
- Expect longer cycle times due to extended fill duration when using the Deep Water option.

CLEANING WITH LESS WATER

The washer has been designed and optimized to provide a thorough cleaning using less water to conserve energy and resources.

As the water drains and moves the load, the level of the items will settle in the basket. This is normal, and does not indicate that more items should be added.

IMPORTANT: You will not see a full basket of water as with other, less efficient washing machines. It is normal for some of the load to be above the water line.

For detailed installation instruction and maintenance information, writer storage, and transportation tips, please see the Owner's Manual included with your machine.
