Common Questions to Understanding Your Widescreen LCD Digital Television

What is the difference between a digital TV broadcast and an analog TV broadcast?

Digital TV broadcast is different from a traditional Analog TV broadcast in that a digital signal has the potential to be significantly cleaner and can be transmitted in resolutions that are much higher. A Digital program can be broadcast in Standard Definition formats of 480 lines interface (similar to Analog TV) or 480 lines progressive. High Definition, which has improved resolution, can be broadcast in formats of 720 lines progressive (720p) or 1080 lines interface (1080i).

How do I get Digital TV Service?

Your digital television is capable of receiving digital channels directly from an over-the-air antenna or from cable. Your television is also capable of displaying digital programming from a digital cable box or a digital satellite receiver (refer to the connections provided in this Quick Setup Guide).

How can I select channels?

If your TV is connected directly to an antenna or cable you can use your TV's remote control to change channels. To switch between available analog and digital channels, press the **DIGITAL/ANALOG** button on the remote control before making your channel selection.

If your TV is receiving channels via a cable box or satellite receiver, you must first select the proper Video Input from your remote control or the TV Menu. You can use the remote control provided with the cable box or satellite receiver to select channels.

Why do I see black bars on my screen?

Often HD programming is created with a 16:9 aspect ratio or wider, which is wider than the typical standard definition programming (4:3). Some digital programming is broadcast in 4:3 format. As a result you may see large black bars on the sides or even the top and bottom of your TV screen. Your TV is capable of expanding the programming to fill the screen. Press the "Wide" Mode button on your remote control or select the wide screen setting from the TV setting to choose your preferred aspect ratio. In some cases 16:9 programming may still show small black bars on the edges of the screen. In this case you can use the "Display Area" function from your TV settings.

How do I mount my TV on the wall?

Mounting the TV on a wall requires that the base stand be removed and that the TV be attached to the wall with a Sony recommended wall mount bracket. For product protection and safety reasons, Sony strongly recommends that wall-mounting of your TV be performed by Sony dealers or licensed contractors only. Do not attempt to install it yourself. See the operating instructions for details.

HD connection

Use this diagram if you have:

Cables Required	
Coaxial	3
Composite	2
Component	1
Audio	2
HDMI	1

If your HD Cable Box and DVD player have HDMI jacks, use HDMI with the HD Cable Box and component video with the DVD Player (as shown). This will give you the best possible picture quality.

For best results, check the cable box's manual for proper setup of the HD output.
